Velikovsky Affair:

Beyond Velikovsky Henry H. Bauer, 1999 Since the appearance in 1950 of Worlds in Collision Immanuel Velikovsky's radical theories of planetary physics have been the center of controversy This book presents an analysis of the Velikovsky affair resolves the misunderstandings and arguments between opposing camps and leads us to an understanding of the scientific process itself

Outsider Theory Jonathan Eburne, 2018-09-18 A vital and timely reminder that modern life owes as much to outlandish thinking as to dominant ideologies What do the Nag Hammadi library Dan Brown's The Da Vinci Code speculative feminist historiography Marcus Garvey's finances and maps drawn by asylum patients have in common Jonathan P Eburne explores this question as never before in Outsider Theory a timely book about outlandish ideas Eburne brings readers on an adventure in intellectual history that stresses the urgency of taking seriously especially in an era of fake news ideas that might otherwise be discarded or regarded as errant unfashionable or even unreasonable Examining the role of such thinking in contemporary intellectual history Eburne challenges the categorical demarcation of good ideas from flawed wild or bad ones addressing the surprising extent to which speculative inquiry extends beyond the work of professional intellectuals to include that of nonprofessionals as well whether amateurs unfashionable observers or the clinically insane Considering the work of a variety of such figures from popular occult writers and gnostics to so called outsider artists and pseudoscientists Eburne argues that an understanding of its circulation and recirculation is indispensable to the history of ideas He devotes close attention to ideas and texts usually omitted from or marginalized within orthodox histories of literary modernism critical theory and continental philosophy yet which have long garnered the critical attention of specialists in religion science studies critical race theory and the history of the occult In doing so he not only sheds new light on a fascinating body of creative thought but also proposes new approaches for situating contemporary humanities scholarship within the history of ideas However important it might be to protect ourselves from bad ideas Outsider Theory shows how crucial it is for us to know how and why such ideas have left their impression on modern day thinking and continue to shape its evolution

The Velikovsky Heresies Laird Scranton, 2012-01-25 A reexamination of Immanuel Velikovsky's controversial Venus theories in light of new astronomical and archaeological findings Provides new evidence from recent space probe missions to support Velikovsky's theories on the formation of Venus Presents recently translated ancient texts from China Korea and Japan that uphold the cometlike descriptions of Venus cited by Velikovsky Examines evidence of major geomagnetic events in 1500 BCE and 750 BCE that correspond with close passes of the comet Venus and its impact with Mars Offers scientific explanations for many

disputed aspects of Velikovsky's theories such as how Venus could have transformed from a comet into an orbiting planet. Surrounded by controversy even before its publication in 1950, Immanuel Velikovsky's *Worlds in Collision* introduced the provocative theory that Venus began as a brilliant comet ejected by Jupiter around 1600 BCE, wreaking chaos on Mars and Earth as it roamed through our solar system prior to settling into its current orbit. Immediately dismissed without any investigation and subject to vicious attacks, Velikovsky's theory is now poised for reexamination in light of recent astronomical and archaeological findings.

Exploring the key points of Velikovsky's theories, Laird Scranton presents evidence from recent space probe missions to show that Venus still exhibits cometlike properties such as its atmospheric composition and could be a young planet. Reviewing the widespread cometlike descriptions of Venus from 1500 BCE to 750 BCE as well as Velikovsky's observation that no records of Venus exist prior to 1600 BCE, Scranton reveals recently translated ancient texts from China, Korea, and Japan that further uphold Velikovsky's theories. Examining evidence of major geomagnetic and climate change events around 1500 BCE and 750 BCE corresponding with close passes of the comet Venus and its impact with Mars, the author offers scientific explanations for many disputed aspects of Velikovsky's theories such as how Venus transformed from a comet into an orbiting planet. By updating this unresolved controversy with new scientific evidence, Scranton helps us to understand how it was that *Worlds in Collision* was the one book found open on Albert Einstein's desk at the time of his death.

Perception, Theory, and Commitment Harold I. Brown, 1979. With originality and clarity, Harold Brown outlines first the logical empiricist tradition and then the more historical and process-oriented approach he calls the new philosophy of science. Examining the two together, he describes the very transition between them as an example of the kind of change in historical tradition with which the new philosophy of science concerns itself. I would recommend it to every historian of science and to every philosopher of science. I found it clear, readable, accurate, cogent, insightful, perceptive, judicious, and full of original ideas.

Maurice A. Finocchiaro, *Isis*, The best and most original aspect of the book is its overall conception.

Spinal Catastrophism Thomas Moynihan, 2019-12-03. The historical continuity of spinal catastrophism traced across multiform encounters between philosophy, psychology, biology, and geology. Drawing on cryptic intimations in the work of J. G. Ballard, Georges Bataille, William Burroughs, Andr e Leroi Gourhan, Elaine Morgan, and Friedrich Nietzsche in the late twentieth century, Daniel Barker formulated the axioms of spinal catastrophism. If human morphology, upright posture, and the possibility of language are the ramified accidents of natural history, then psychic ailments are ultimately afflictions of the spine, which itself is a scale model of biogenetic trauma, a portable map of the catastrophic events that shaped that atrocity, exhibition of evolutionary traumata, the sick orthograde talking mammal. Tracing its provenance through the biological notions of phylogeny and organic memory that fueled early psychoanalysis back into idealism, nature philosophy, and romanticism, and
