Technology and Organization Nelson Phillips,Dorothy S. Griffiths,Graham Sewell,2010 The Semantics of Grammatical Dependencies argues that constraints of interaction from semantic evaluations enforce grammatical dependency patterns that recur across natural languages and within constructions at intra and inter sentential levels as well as discourse levels The book develops along three lines Firstly a handle is gained on why languages are structured around localities with localities functioning as actions of reset to permit the reuse of grammatical resources that maintain a fixed semantic contribution Secondly sensitivity is brought to the linear and hierarchical placement of scope information to capture ordering effects like accessibility crossover and intervention Thirdly an interestingly different perspective is reached on what it means to be grammatical rather than being a destructive feature that bans or filters out bad structure grammaticality takes on a role of constructive guidance that keeps languages to what are generally unambiguous canonical forms that moreover guarantee required dependencies The book will be of interest to advanced undergraduate students post graduate and research students and all researchers in the formal analysis of the syntax semantics and pragmatics of natural language

Organizing Technologies Ulla Eriksson-Zetterquist,Thomas Kalling,Alexander Styhre,2011 Organization theory and management studies tend to underrate the importance of technological resources in accomplishing organized activities In organizations a wide variety of technologies are mobilized on a day to day basis to accomplish organized activities Some of these technologies are subject to continuous discussions and controversies while others are taken for granted or simply ignored This book presents theories about technology and its recursive ability to both shape its users and to be shaped by its very use The book outlines an analytical model where technologies serve three broad functions within organizations to produce goods and services to enhance administrative work and to connect and co align organizations within networks supply chains or distribution systems
