Business Process Analysis Geoffrey Darnton,Moksha Darnton,1997 This is a ground breaking book primarily in its successful attempt to operationalise and provide empirical foundations for procedures for radical change previously developed only intuitively The book is supported by prominent academics and practitioners in the field including Jim Short LBS Raul Espejo Dan Teichroew Michigan and others It should become the standard reference for managers and consultants in BPR

*Performance Modeling for Computer Architects* C. M. Krishna,1995-10-14 As computers become more complex the number and complexity of the tasks facing the computer architect have increased Computer performance often depends in complex way on the design parameters and intuition that

must be supplemented by performance studies to enhance design productivity This book introduces computer architects to computer system performance models and shows how they are relatively simple inexpensive to implement and sufficiently accurate for most purposes It discusses the development of performance models based on queuing theory and probability The text also shows how they are used to provide quick approximate calculations to indicate basic performance tradeoffs and narrow the range of parameters to consider when determining system configurations It illustrates how performance models can demonstrate how a memory system is to be configured what the cache structure should be and what incremental changes in cache size can have on the miss rate A particularly deep knowledge of probability theory or any other mathematical field to understand the papers in this volume is not required *Publications of the National Bureau of Standards ...
