Satellite Monitoring of Water Resources in the Middle East

Amin Shaban, 2022-10-15 This book presents both updated and new measurements on water resources from selective pilot areas from the Middle East. Demand for water has become very crucial notably in arid and semiarid regions like in the Middle East. The changing climate and the increased population are the most striking challenges on water resources in this region where the largest part of its territory is dry lands and deserts with minimal precipitation and high evaporation rates and thus the average per capita of water does not exceed 25 m³ year. This resulted in developing many studies and researches in different Middle East countries to clearly identify and assess the hydrological characteristics of the available water resources and to explore new resources in order to secure balanced water supply demand. As a first of its type this book introduces comprehensive knowledge on the successful reports of the use of satellite images in water studies in the Middle East and the economic value resulted from adopting these techniques. Based on illustrated case studies the book will represent a significant resource for a large number of experts, academics, researchers, engineers and different level stakeholders including the decision makers.

Palliative Care Nursing Sheila Payne, 2008-08-01

It has been a true pleasure to have had the opportunity to peruse the second edition of Palliative Care Nursing. This book authored predominately by UK based experts succeeds in presenting sophisticated thoughts in readily accessible language. Each chapter begins with a summary of key points with both classic and new relevant literature well integrated into the text. I have also been particularly impressed with the editors final chapter in which they synthesize a number of crucial issues for the future development of palliative care. This second edition makes a significant contribution to both the palliative care literature as well as to nursing literature. Carol Tishelman, Karolinska Institutet, Stockholm, Sweden. I find Palliative Care Nursing a very attractive book for nurses but also for other disciplines to learn about nursing and to learn about palliative care. The book is voluminous, informative and educationally well constructed. Frameworks and models in this book will give nurses the opportunity to make up their own process to offer support and be a carer for the incurably ill person and his/her family as a skilled companion. This book gives the possibility for nurses to spread one clear voice about palliative care nursing. Congratulations to all the authors. Martine De Vlieger, Palliatieve Hulpverlening Antwerpen v z w University of Antwerp, Belgium. This book should be compulsory.
