Western Civilization Frank Roy Willis, 1989 *Western Civilization* Jackson J. Spielvogel, 2004-02-01 This brief best selling Western civilization text has helped thousands of students learn about the world they live in by exploring the story of its past Jack Spielvogel's engaging chronological narrative weaves the political economic social religious intellectual cultural and military aspects of history into a gripping story that is as memorable as it is instructive Each chapter offers a substantial introduction and conclusion that sparks students imaginations by giving them a context within which to understand these disparate themes And while the single author narrative makes it easy for students to follow the story of Western civilization Spielvogel has included dozens of maps and primary sources including official documents poems and songs that enliven the past while introducing students to the challenges involved in interpreting history This edition includes substantial new material on world history to show students the impact of other parts of the world on Western civilization and is now the BRIEFEST of the leading brief Western civilization texts Available in the following split options WESTERN CIVILIZATION A BRIEF HISTORY Third Edition Chapters 1-29 ISBN 0 534 62721 8 WESTERN CIVILIZATION A BRIEF HISTORY Volume I To 1715 Third Edition Chapters 1-16 ISBN 0 534 62722 6 WESTERN CIVILIZATION A BRIEF HISTORY Volume II Since 1500 Third Edition Chapters 13-29 ISBN 0 534 62723 4 **World Civilization** Robin W. Winks, 1993-05 Robin W Winks placed particular emphasis on those developments that most directly explain the nature of the

modern world social diffusion group and national consciousness technological change religious identities those aspects of intellectual history that have contributed most to our current dilemmas In turn this means that there is more in World Civilization A Brief History about nationalism imperialism or ethnic identities than there is about monarchies feudalism or diplomacy The result of the strategic and intellectual decisions made with respect to this textbook is that its proportions are not the customary ones Particular emphasis is placed on the early origins of civilizations on Greece and Rome and on the period of the so called barbarian invasions because it is by studying these periods that students may best learn how societies are formed Particular emphasis is also placed on the period from the French Revolution on for it is the events of the last two hundred years that have most closely shaped our present condition This book can be read straight through and in its entirety as an interpretive statement about Western history written by a person who knew a good bit about non Western history and who could thus throw into perspective the unusual the commonplace and the comparable in that sector of history conventionally labeled Western The text draws on over thirty five years of discovering in the classroom what students themselves wish to ask about the past rather than what a body of scholars may have concluded they should wish to ask Though this book is largely about Western civilization it is also about world civilizations for from the eighteenth century forward and in many aspects of life much earlier the non West has interacted with the West in such a way as to make it virtually impossible to separate one from the other when dealing at this level of generalization As a teacher of the history of exploration and discovery of imperialism and decolonization
