Moses, 2003 Exploring the tensions inherent in transition this perceptive book offers a wide ranging overview of the impact of democracy and capitalism on the former Soviet republics Leading scholars assess the region's daunting problems in the key realms of privatization democratization foreign investment agrarian reform local governance and market economics The contributors argue that the central dilemma facing all these fledgling countries is the inherent contradiction between the immediate pursuit of privatization and foreign investment and the long term policy goal of democratization Offering both theoretical and comparative perspectives on the far reaching implications of nation building and democratic transition this valuable study will enable both students and scholars to comprehend the unique difficulties of transition

(Un)avoidable Conflict in Ukraine Cristian Nitoiu, 2025-06-26 Taking a conceptual approach to European Russian relations in the post Cold War era this book traces how each side's ideal self came into conflict with fault lines in international politics Russia's 2022 full scale invasion of Ukraine is not only a symptom of conflict taking over the European continent but also a point of no return that will be difficult to roll

back Could the state of conflict on the European continent have been avoided To understand the nature and evolution of conflict with Russia this book presents a theoretically informed discussion of the way relations between the European Union EU and Russia deteriorated beyond repair during the more than three decades since the collapse of the Soviet Union First the book develops the concept of ideal self of states and international organisations like the EU which posits that a series of ideal perceptions about how the self should act in the world order drives the behaviour of states and their policymakers Second the book turns to the study of fault lines or spaces of divergence in the world order that harbour the potential for conflict With these two theoretical toolkits the book shows how leaders in the EU and Russia by February 2022 came to view conflict as a feasible preferable and possibly the only option available to them Even though neither the EU nor Russia had desired conflict both made little effort to avoid it As a result the European continent has sleepwalked into conflict with the potential for that conflict to spill over from Europe and escalate beyond a point of no return between the West and its global challengers

The Baltic as a Multicultural World Marko Lehti, 2005 The end of the Cold War brought the Baltic Sea area into the limelight of political and cultural cooperation Since then the Baltic Sea area has gained a powerful position as a dynamic European sub region Still like other similar kinds of areas defined by a sea or a river the Mediterranean world the Black Sea or the Danube the Baltic Sea area is hard to define and it has as many definitions as there are map makers The sea itself plays a central role but its influence is vague and always contingent This book has sought to introduce multiple insights for focusing on the Baltic All the contributions examine the question of the essence of the Baltic and the source of its unity and in particular concentrate on multi culturality and multi nationality in the Baltic context Some of the contributions survey the whole Baltic Sea area while others concentrate on the Baltic countries and some of them have found the Baltic in the limited environment of parish and town The Baltic is comprehended as a label that opens stimulating possibilities for replacing nation centrism with narratives of another kind extending beyond the current nation states This understanding provides opportunities for defining a multi ethnic multi lingual and multi cultural region and the diversity of identities that has existed

The Post-Soviet Economy Anders Åslund, 1992 In the context of the Soviet economic crisis of 1991 this work offers the views of 12 economists half from the USSR half from the West While all agree on the need for a market economy the Soviet writers here argue for a markedly more gradual change than do their Western counterparts

Post-Soviet Affairs, 1996

EU Eastern Enlargement and the Russian Transformation Crisis Paul J.J. Welfens, 2012-12-06 Europe s economic and political landscape is changing dramatically The demise of the socialist CMEA and the USSR has allowed eastern European economies to open up and caused Russia the CIS to engage in a series of difficult reforms which have been supported by the G 7 and the International Monetary Fund plus the World Bank on the one

hand and on the other hand by the EU and the EBRD While some of the early Visegrad countries apparently were rather successful in their transition attempt systemic transition approaches in other countries Romania and Bulgaria and above all in Russia largely were a failure Economic hardship social unrest political radicalization and the international spreading of criminal activities can be identified as problems from the failure of Russia's first transition attempt This book deals from an international perspective with the postsocialist countries in Europe i e there is a focus on eastern enlargement and on Russia on the one hand on the other hand the topic is which international influences and effects will emerge from EU enlargement and the Russian transition While chapter A exclusively deals with major problems of eastern enlargement and the policy options for dealing with this difficult problem chapter B is devoted to the Russian transformation crisis There the analysis has a focus on Russia in its own right but also on the potential negative spillovers of a Russian transformation disaster which could occur in the late 1990s

Water and Security in Central Asia Virpi Stucki,Kai Wegerich,Muhammad Mizanur Rahaman,Olli Varis,2016-04-08 Examining the water development and security linkages in Central Asia can feel a bit like solving a Rubik s cube The Rubik s cube starts to usually find structure and the different pieces find their places when its solver adopts a systematic approach Still solving the whole cube takes time and perseverance This is also the case with water and security in Central Asia as demonstrated by the chapters in this book In the case of water and security in Central Asia there are many faces including not only the Central Asian states but also the neighbouring countries and other players of global geopolitics stickers such as policies practices causes and impacts and colours such as the different stakeholders ranging from the micro and meso levels to the macro level Understanding all these or getting clarity on the nexus can seem extremely challenging Even though none of the chapters alone answers the question of what constitutes water and security in Central Asia each of them gives thoughtful ideas and information on the complexity of the issue This book was published as a special issue of the International Journal of Water Resources Development **Tension Areas of the World** David Gordon Bennett,1998
