Telescope Control Mark Trueblood, Russell Genet, 1997-01-01 **Setting-Up a Small Observatory: From Concept to Construction** David Arditti, 2007-12-20 Arditti's approachable work covers all the details of design, siting and construction once a basic type has been decided upon. It is written in a way that is equally applicable to the USA and UK where there are slightly different building regulations and deals with matters that are basic to building and commissioning any amateur observatory. Uniquely David Arditti also considers the aesthetics of amateur observatories, fitting them in with family and neighbors and maybe disguising them as more common garden buildings if necessary. Every amateur astronomer who wants a purpose-built observatory and let's face it, which one of them doesn't will find this book invaluable.

National Aeronautics and Space Administration, 1971 *Motions in the Solar Atmosphere* A. Hanslmeier, Mauro Messerotti, 2013-03-09 This book contains the proceedings of the Summerschool and Workshop *Motions in the Solar Atmosphere* held from September 1st to September 12th 1997 at the Solar Observatory Kanzelhöhe which belongs to the Astronomical Institute of the University of Graz, Austria. This type of conference has proved to be very successful in bringing together experts from specialized topics in solar physics and young scientists and students from different countries. Moreover, the summerschool was accompanied by a workshop which offered young scientists the opportunity to present their new results to a general audience. In total, the summerschool and the workshop were attended by 50 participants from 10 different countries. The topic selected was quite general, covering the whole solar atmosphere and its dynamic processes from dynamo actions and large and small scale motions in the photosphere through the complex dynamics of the chromosphere to the corona. Also, the possible influences of variations in solar output parameters on the Earth's climate were addressed. The main lectures were given by 7 lecturers. Furthermore, there were 20 contributions to the workshop which were presented in oral form. The selection of the Kanzelhöhe Solar Observatory located in Central Europe, Austria, also permitted colleagues from the former eastern countries to attend the meeting. At the Kanzelhöhe Observatory, new instruments had been recently installed so that the meeting provided a further stimulus for the local people working there.
