The Flight From Creation:

The Flight from Creation Gustaf Wingren, 2019-05-30 I have always sought to choose topics that throw light on the integrating function of the Christian faith in human life as a whole For this reason I have felt that the modern tendency to cut the church off from ordinary human life is the most profound theological tragedy of our time This statement by noted Swedish theologian Gustaf Wingren reflects his independence from the primary train of theological thought in the twentieth century Where many other theologians following the lead of Karl Barth have centered their theologies around the second article of the Apostles Creed Wingren has re-emphasized the first article in an attempt to recover the theological importance of the doctrine of creation Wingren's view developed in faithfulness to the church's theology is consonant with the increasing demands that world concerns and problems are placing on the church It makes a place for the church within the world not apart from it and it opens up the doors of the church to meet life's problems on their own ground Developed from a series of lectures at the Contemporary Theology Institute in Montreal this is an important theological work Here Wingren explores another facet of a theme that he has consistently maintained in his writing The critical dialog with prominent theologians of recent years develops a strong case for the doctrine of creation as a basic context for theology and leaves no doubt as to which direction the church should move

The Flight of Events German ARCE ROSS, 2024-05-31 The Flight of Events the second book of a Psychopathology of Melancholia Series after Manie m lancolie et facteurs blancs Beauchesne Paris 2009 is a work on altruistic anguishes in manic depressive suicides In this book German Arce Ross has chosen to focus on the psychological processes that occur prior to the act of suicide rather than on the act itself We can detect these processes in a subject during the period between the decision to commit suicide and the passage to the act In the consideration of certain moments preceding a suicidal or criminal act in the case of critical episodes that are non-delusional non-hallucinated and non-acted but sometimes assimilated to psychotic or twilight moments where we locate in particular a discontinuity or a radical rupture albeit momentary with the Other we can observe that there are things facts or events that happen to the subject without any form of control over them whatsoever In these uncontrolled intersubjective events what the subject suffers from is a tendency to undergo the acts that he himself makes others perform During this flight of events it is not entirely true that the subject flees the events of his life it is rather the events that flee

Resistance, Flight, Creation Dorothea Olkowski, 2000 Thirteen women at the forefront of philosophy locate new feminist points of view within the discipline by rigorously engaging works of contemporary French philosophy In so doing they both transform the standard practices of the field and carve out new territory These writers amplify the work of feminist philosophers such as Simone de Beauvoir Luce Irigaray and Sarah Kofman in ways that are both stylistically and substantively creative They also appropriate for radical feminist use the works of male philosophers such as Michel Foucault Gilles Deleuze Maurice Merleau-Ponty and Jean-Paul Sartre The essays illustrate the manner in which feminist philosophers bypass traditional methodology in favor of a

disciplinary freedom characterized by fluid methodologies best exemplified in Beauvoir's work and by the employment of imaginative forms including the autobiographical and the poetic. The modes of inquiry used here range variously from psychoanalysis and existentialism to deconstruction, post-structuralism and newly resurgent phenomenology. This volume also contains a comprehensive bibliography of feminist thinkers who are enacting French philosophy in English, German and French.

From Booking to Touchdown: Inside the Invisible Systems That Power Modern Air Travel Kavya Muppaneni, 2026-01-16

Behind every flight that departs and lands on schedule lies a vast network of invisible systems: operational decisions and technological infrastructures that most passengers never see. *From Booking to Touchdown* unveils the complex ecosystem that powers modern aviation, from flight scheduling and aircraft allocation to air traffic coordination, weather management, baggage logistics, and passenger experience systems. Drawing on real-world industry practices, the book explains how airlines design routes, manage operational disruptions, optimize aircraft utilization, and coordinate with air traffic control systems to keep global air travel functioning efficiently. It also explores how modern technologies, algorithms, and decision frameworks support everything from baggage routing to loyalty programs and compensation systems. Written with clarity and technical insight, this book offers readers a rare behind-the-scenes view of aviation operations. Whether you are an aviation enthusiast, technology professional, or traveler curious about what happens beyond the boarding gate, *From Booking to Touchdown* provides a fascinating journey through the systems that keep the world flying.
