Using Experience For Learning:

Using Experience For Learning Boud, David, Cohen, Ruth, Walker, David, 1993-10-01 What are the key ideas that underpin learning from experience How do we learn from experience How does context and purpose influence learning How does experience impact on individual and group learning How can we help others to learn from their experience Using Experience for Learning reflects current interest in the importance of experience in informal and formal learning whether it be applied for course credit new forms of learning in the workplace or acknowledging autonomous learning outside educational institutions It also emphasizes the role of personal experience in learning ideas are not separate from experience relationships and personal interests impact on learning and emotions have a vital part to play in intellectual learning All the contributors write themselves into their chapters giving an autobiographical account of how their experiences have influenced their learning and what has led them to their current views and practice Using Experience for Learning brings together a wide range of perspectives and conceptual frameworks with contributors from four continents and should be a valuable addition to the field of experiential learning

Working with Experience David Boud, Nod Miller, 1996 Everyday we are confronted with problems and challenges which we address by drawing on our experience and by using this experience to find ways of learning what to do in new circumstances Learning through experience is the normal commonplace approach to learning and we take it for granted Whilst much is known about teaching and being taught far less attention has been given to learning in context in particular to learning outside the classroom Yet this is in fact where most learning takes place One especially neglected area is the role which people other than the learner play in facilitating learning This role is undertaken not only by teachers trainers parents and counsellors but also by managers supervisors care givers and friends This book brings together the experiences of a number of practitioners who write from often strongly contrasting perspectives these include feminism Marxism critical pedagogy post modernism and Gestalt humanistic clinical and transpersonal psychology The authors also come from a wide range of international backgrounds including adult higher and teacher education community work organisational development and psychotherapy Each chapter is grounded not only in professional practice and in theory but also in personal experience Overall then the book provides fascinating insights into what some good practitioners do to promote learning and how they make sense of this David Boud is professor in the School of Adult Education University of Technology Sydney Nod Miller is Professor in the Department of Innovation Studies University of East London
