

Using Light

William Thomas Alder Emtage

Using Light:

Painting with Light ,2016-12-19 Throw your preconceptions about light painting out the window and prepare for a creative journey that will revolutionize your photography Light painting is a classic photography technique that involves selectively illuminating sections of a dark subject by moving a light source like a flashlight over the subject during the course of a seconds or minutes long exposure This results in uniquely nuanced depictions with a high level of technical artistry As Eric Curry shows however today s hardware and software allow you to produce light painting images that are anything but traditional In this book you ll learn step by step how to plan and execute incredible nuanced images using simple gear a whole lot of imagination and today s powerful postproduction software With these techniques your imagination is the only limit to what you can create

Essential CG Lighting Techniques with 3ds Max Darren Brooker,2012-12-12 Certified by Autodesk Darren Brooker s new edition teaches the production techniques behind real world work The tutorials take you from the fundamentals of lighting right through to advanced techniques

Lighting for Photographers Joseph Lavine,Brad Bartholomew,2019-08-13 Lighting is one of the most important aspects of any photograph The best images create dimension and drama which goes beyond formulas and lighting recipes In *Lighting for Photographers An Introductory Guide to Professional Photography* commercial photographers and instructors Joe Lavine and Brad Bartholomew offer a unique philosophy of lighting starting with an understanding of the characteristics of lighting to build great shots Including interviews from professional photographers and illustrated with over 200 images this book introduces basic photographic concepts and equipment needs and takes the reader from the lighting process through to starting a successful career in photography both in the studio and on location Readers will learn a comprehensive approach to lighting including what light does composition experimentation practical tools and techniques equipment metering and histograms and how to launch and grow their career With downloadable instructor resources featuring discussion questions and quizzes this fully updated edition is ideal for introductory level photography and lighting courses as well as the amateur photographer looking to apply the appropriate lighting to realize their conceptual and aesthetic goals
