

Using The Internet

JAMES, K. L.

Using The Internet:

Using Internet Primary Sources to Teach Critical Thinking Skills in World Literature Roxanne M. Kent-Drury,2005-03-30 Presenting web sites from around the world covering much of the world s literature this book provides creative and interesting thinking activities to enhance student understanding of literature and culture and to promote critical thinking This book will be very useful to teachers of world history and literature at the senior high school and undergraduate level Part of a well reviewed series of titles *Using Internet Primary Sources to Promote Critical Thinking* carries on the tradition of excellence in instructional tools Grades 9 12

Using Internet Primary Sources to Teach Critical Thinking Skills in Visual Arts Pamela J. Eyerdam,2003-03-30 Use the Internet to teach visual arts and refine students critical thinking skills This book is based on the Discipline Based Art Education program a proven art instruction program that teaches everything from the creative process and art history to criticism and aesthetics An abundance of primary source Web sites and background information is offered The main focus of the book is western art history and painting but examples of sculpture drawings prints and architecture are included along with a chapter on diversity Part I provides background material A brief history of art education is presented followed by a review of the components of design elements and principles The book describes using the Internet as a primary source by identifying and evaluating websites Part II follows the program through the main historical periods from prehistoric and ancient Middle Eastern art through the Renaissance through the 20th century A bibliography and index are included

Using Internet Primary Sources to Teach Critical Thinking Skills in World Languages Kent Norsworthy,Grete Pasch,2000-11-30 Language teachers social studies teachers and school library media specialists will find this resource invaluable for providing lessons and activities in critical thinking for students in grades 7 12 It is filled with over 200 primary source Internet sites covering the Chinese French German Spanish Japanese Russian and Latin languages Each Web site will help reinforce language skills while providing students with interactive lessons on the unique culture of the peoples who speak the language The next best thing to visiting the country itself For each of the 56 primary Web sites a site summary is given describing its contents and usefulness to teachers and school library media specialists Site subjects may include a country s radio or news program the history of a country and its visual arts including museums foods eaten by the people who speak this language and recipes on how to prepare them ceremonies customs and sports enjoyed geography of the countries who speak this language and sites to help practice the language itself Following are a list of questions and activities which students can prepare orally or in written form and at least four more related Web sites are provided for further study Using this book will not only help students increase their language skills but it will also open up the entire culture to enable students to experience it just as if they were visiting

[Using Internet Primary Sources to Teach Critical Thinking Skills in Geography](#) Gary S. Elbow,Martha B. Sharma,2000-09-30 Geography teachers and school library media specialists will find this resource indispensable for providing classroom lessons and

activities in critical thinking for geography students in grades 7-12. It is filled with over 75 primary source Internet sites covering such topics as Places and Regions, Physical Systems, Human Systems, Environment and Society, and the Uses of Geography, and will be an invaluable tool in helping teachers and librarians meet the standards set forth in the 1994 publication *Geography for Life: National Geography Standards*. Each site is accompanied by a site summary that describes the site contents and usefulness to geography teachers and school library media specialists. Site subjects include Urban Landscapes, Volcanoes and Earthquakes, Weather, The U.S. Census, and the World Wildlife Fund Global Network. The questions and activities that follow are designed to develop critical thinking skills for both oral and written presentations. An appendix of additional geography resources includes Internet addresses for approximately 25 sites relating to maps, primary sources, and critical thinking. This will provide teachers and librarians with even more resources for developing lessons to help each student meet all 18 of the National Geography Standards.

Using the Internet Jerry Honeycutt, 1996
[Using Internet Primary Sources to Teach Critical Thinking Skills in Government, Economics, and Contemporary World Issues](#) James M. Shiveley, Phillip J. VanFossen, 2001-09-30
Teachers of political science, social studies, and economics, as well as school library media specialists, will find this resource invaluable for incorporating the Internet into their classroom lessons. Over 150 primary source Web sites are referenced and paired with questions and activities designed to encourage critical thinking skills. Completing the activities for the lessons in this book will allow students to evaluate the source of information, the content presented, and its usefulness in the context of their assignments. Along with each Web site, a summary of the site's contents identifies important primary source documents such as constitutions, treaties, speeches, court cases, statistics, and other official documents. The questions and activities invite the students to log on to the Web site, read the information presented, interact with the data, and analyze it critically to answer such questions as: Who created this document? Is the source reliable? How is the information useful, and how does it relate to present-day circumstances? If I were in this situation, would I have responded the same way as the person in charge? Strengthening these critical thinking skills will help prepare students for both college and career in the 21st century.

Using Internet Primary Sources to Teach Critical Thinking Skills in Mathematics Evan M. Glazer, 2001-08-30
Mathematics teachers and school library media specialists will find this book a valuable resource for using the Web to promote critical thinking in the high school mathematics classroom. It is filled with instructional strategies and an expansive set of activities that cover a broad array of mathematics topics, spanning from prealgebra through calculus. Teachers using the questions and activities in this book will help their students meet the standards set forth by the National Council for Teachers of Mathematics. Various types of mathematics-related sources on the Internet are outlined within this book, including data and simulations related to real-world situations such as saving funds and computing interest earned for college, purchasing a home, or decoding train and plane schedules. The author develops a framework for critical thinking in mathematics and helps teachers create a supportive classroom environment. Each activity

highlights a web source the mathematics topics involved the appropriate grade levels of study possible student investigations and related web sources for continued exploration promoting a student centered inquiry
