Hauck, Arthur R. Upgren, 1993 **Workshop on Databases for Galactic Structure : meeting held at Swarthmore College, Swarthmore, Pennsylvania, May 17 - 19, 1993** A. G. Davis Philip, 1993 **Allen's Astrophysical Quantities** Arthur N. Cox, 2015-03-19 This new fourth edition of Allen's classic *Astrophysical Quantities* belongs on every astronomer's bookshelf. It has been thoroughly revised and brought up to date by a team of more than ninety internationally renowned astronomers and astrophysicists. While it follows the basic format of the original, this indispensable reference has grown to more than twice the size of the earlier editions to accommodate the great strides made in astronomy and astrophysics. It includes detailed tables of the most recent data on General constants and units, Atoms, molecules, and spectra, Observational astronomy at all wavelengths from radio to gamma rays and neutrinos, Planetary astronomy, Earth, planets, and satellites, and solar system small bodies, The Sun, normal stars, and stars with special characteristics, Stellar populations, Cataclysmic and symbiotic variables, supernovae, Theoretical stellar evolution, Circumstellar and interstellar material, Star clusters, galaxies, quasars, and active galactic nuclei, Clusters and groups of galaxies, Cosmology. As well as much explanatory material and extensive and up to date bibliographies. [Astronomy from Wide-Field Imaging](#) International Astronomical Union. Symposium, 1994-06-30 The proceedings of the August 1993 symposium comprise some 200 papers including posters organized in 16 natural sections: wide field sky surveys and patrols, digital detectors in wide field imaging, photography in wide field imaging, digitized wide field surveys, image detection, cataloging and classification, calibration, astrometric and photometric archiving, and databases, solar system surveys, galactic structure, the Magellanic Clouds, local group dwarf galaxies, and LSB galaxies, properties of nearby galaxies, properties and clustering of galaxies and clusters, mapping the large scale structure, properties and clustering of objects at large redshifts, and conference summary and resolutions. No subject index. Annotation copyright by Book News Inc, Portland, OR. **Proper Motions and Galactic Astronomy** Roberta M. Humphreys, 1997 **Symposium** International Astronomical Union, 1994 **Literature 1988, Part 2** Astronomisches Rechen-Institut, 2013-06-29 From the reviews *Astronomy and Astrophysics Abstracts* has appeared in semi-annual volumes since 1969 and it has already become one of the fundamental publications in the fields of astronomy, astrophysics, and neighbouring sciences. It is the most important English language abstracting journal in the mentioned branches. The abstracts are classified under more than a hundred subject categories, thus permitting a quick survey of the whole extended material. The AAA is a valuable and important publication for all students and scientists working in the fields of astronomy and related sciences. As such, it represents a necessary ingredient of any astronomical library all over the world. *Space Science Reviews* 1. Dividing the whole field plus related subjects into 108 categories, each work is numbered and most are accompanied by brief abstracts. Fairly comprehensive cross-referencing links relevant papers to

more than one category and exhaustive author and subject indices are to be found at the back making the catalogues easy to use The series appears to be so complete in its coverage and always less than a year out of date that I shall certainly have to make a little more space on those shelves for future volumes
