Social Science Methods In The Legal Process

Camilla Rothe

Social Science Methods In The Legal Process:

Social Science Methods in the Legal Process Noreen L. Channels, 1985 This volume is the first to provide a systematic introduction to the methods of social science for the legal professions and decision makers in public policy fields Designed as both a text and a convenient reference the book provides an understanding of all the elements in the research process and acquaints the reader with the choices that are available in designing and conducting research A particularly useful feature is each chapter's examination of research cited in specific court or public policy decisions together with discussion of possible legal applications of various research approaches

Social Science, Social Policy, and the Law Patricia Ewick, Robert A. Kagan, Austin Sarat, 1999-06-10 Social science has been an important influence on legal thought since the legal realists of the 1930s began to argue that laws should be socially workable as well as legally valid With the expansion of legal rights in the 1960s the law and social science were bound together by an optimistic belief that legal interventions if fully informed by social science could become an effective instrument of social improvement Legal justice it was hoped could translate directly into social justice Though this optimism has receded in both disciplines social science and the law have remained intimately connected *Social Science Social Policy and the Law* maps out this new relationship applying social science to particular legal issues and reflecting upon the role of social science in legal thought Several case studies illustrate the way that the law is embedded within the tangled interests and incentives that drive the social world One study examines the entrepreneurialism that has shaped our systems of punishment from the colonial practice of deportation to today's privatized jails Another case shows how many of those who do not qualify for legal aid cannot afford an effective legal defense with the consequence that economic inequality leads to inequality before the law Two other studies look at the mixed results of legal regulation the failure of legal safeguards to stop NASA's fatal 1986 Challenger launch decision and the complicated effects of regulations to curb conflicts of interest in law firms These two cases demonstrate that the law's effectiveness can depend not only on how it is drafted but also on how well it harmonizes with pre-existing social norms and patterns of self-regulation The contributors to this volume share the belief that social science can and should influence legal policymaking Empirical research is necessary to offset anecdotal evidence and untested assertions But research that is acceptable to the academy may not stand up in court and as a result social science does not always get a sympathetic hearing from legal decision makers The relationship between social science and the law will always be complex this volume takes a lead in showing how it can nonetheless be productive

Social Science Abstracts, 1930 **Science of Legal Method**, 1917 *Social Science in Law* John Monahan, Laurens Walker, 2006 The publication incorporates *Dauber v Merrill Dow Pharmaceuticals Inc* the United States Supreme Court's landmark decision on scientific evidence in addition to new *Daubert* based cases cited throughout the book The book offers an in-depth discussion of the growing use of survey methods to establish damages in mass tort cases The authors have integrated the latest Web site addresses to aid in further social science and legal research It includes

selections from two handbooks the Federal Judicial Center Reference Manual on Scientific Evidence and West's Modern Scientific Evidence *Stewart Macaulay: Selected Works* David Campbell, 2020-10-30 This book represents a unique resource about Stewart Macaulay one of the common law world's leading scholars of the law of contract and of the law in action approach to the study of law Since 1959 he has published over 50 articles in leading journals a number of working papers with colleagues at the University of Wisconsin Law School a pathbreaking casebook for the teaching of the law of contract and with other colleagues equally pathbreaking collections of materials for the teaching of the law in action or law in context approach to the study of law In this work Macaulay has established himself as one of the postwar world's leading scholars of the law of contract and of the sociology of law His work is an absolute reference point in both disciplines and it has attracted great attention elsewhere most notably in economic sociology where his concept of non contractual economic relationships is regarded as an important theoretical innovation Macaulay's work has become an object of commentary in its own right and the proposed book is intended to assist further such commentary by making hitherto difficult to obtain works readily accessible Most of Macaulay's work is now when the leading journals are generally available in electronic form readily accessible to students and researchers in universities There are however a number of interesting and in most cases important works published in less accessible journals or works which were not published in an electronic form which are difficult to obtain This book will make them readily available and in so doing will make it possible in future for scholars to have Macaulay's complete oeuvre readily to hand Although Macaulay's work has provoked very considerable discussion there previously have been no overall accounts of that work as opposed to critical engagements with aspects of it In this book two additional essays by leading commentators give accounts of Macaulay's work and provide an introduction to exegesis of and general evaluation of Macaulay's work as a whole which is not to be found in the existing literature
