Starting Science Starting Science:

Starting Science: Students' Alan Fraser,Ian Gilchrist,1985-01-31 A highly successful general science course the enduring popularity of Starting Science stems from its built in differentiation colourful straightforward style and its content based approach Key Points Specifically designed for use in mixed ability classes Divided into units which are presented at three levels of difficulty Careful explanation of scientific concepts set in everyday contexts Range of questions for independent and class use Starting Science Tony Partridge,1996-01 Starting Science: Student Book 2 Alan Fraser,Ian Gilchrist,1986-02-13 Part of Starting Science a general science course this title is designed for use in mixed ability classes It is divided into units which are presented at three levels of difficulty It includes explanations of scientific concepts that are set in everyday contexts along with a range of questions for independent and class use Starting Science...Again? Martin Braund,2008-10-09 The structure of this book encourages active participation via reflective activity boxes which further allows for the engagement and consolidation of ideas Evidence based research is cited resulting in the author suggesting a number of practical activities to encourage progression and continuity in science ESCalate Why do pupils learning and motivation slow down markedly as they move from primary to secondary school Why is this situation worse in science than in any other curriculum subject This book combines reports of and reflection on best practice in improving progression and continuity of teaching and learning in science particularly at that transition stage between primary and secondary school Presenting the views of teachers and pupils on progression learning and application of science the book suggests practical ways of improving teaching and learning in science Each chapter includes examples of learning materials with notes on how these might be used or adapted by teachers in their own classroom settings Science teaching in secondary schools is often based on assumptions that children know or can do very little so the job in the secondary school becomes one of showing pupils how to start doing science properly as if from scratch The damage that this false view can do to pupils learning motivation and confidence is clear This book will help teachers to assess children s prior knowledge effectively and build meaningful and enjoyable science lessons *Starting Science 1* Diana Bickford,1993-12 Starting Science ,1996
