Challenges for Next Generation Network Operations and Service Management Yan Ma, Deokjai Choi, Shingo Ata, 2008-10-16 th We are delighted to present the proceedings of the 11 Asia Pacific Network Operations and Management Symposium APNOMS 2008 which was held in Beijing China during October 22-24 2008 The Organizing Committee OC selected the theme of this year symposium as Challenges for Next Generation Network Operations and Service Management Research and development on next generation networks NGNs have been carried out over the last few years and we are already seeing their ployment and operations in many parts of Asia Pacific countries We are also beginning to experience new and interesting services that utilize these NGNs We are certain that we will see more deployment of NGNs and NGN services in the next few years Thus the operations and management of NGNs and their services are very important to the network operators and service providers At the same time they are also concerned about new and more effective ways of performing the operations and management This year the APNOMS call for papers received 195 paper submissions from 19 different countries including countries outside the Asia Pacific region Europe Middle East North and South America Each paper was carefully reviewed by at least three international experts Based on review scores the APNOMS 2008 Technical Program Committee discussed the selection of papers and selected 43 high quality papers 22.1% of submissions as full papers and 34 papers as short papers Accepted papers were arranged into ten technical sessions and two short paper sessions poster presentation

Dependable Systems: Software, Computing, Networks Jürg Kohlas, Bertrand Meyer, André Schiper, 2006-07-31 Modern civilization relies on a functioning information infrastructure As a result dependability has become a central issue in all disciplines of systems engineering and software architecture Theories methods and tools that help to master the problems encountered in the design process and the management of operations are therefore of utmost importance for the future of information and communication technology The present volume documents the results of a research program on Dependable Information and Communication Systems DICS The members of the project met in two workshops organized by the Hasler Foundation This state of the art survey contains 3 overview articles identifying major issues of dependability and presenting

the latest solutions as well as 10 carefully selected and revised papers depicting the research results originating from those workshops The first workshop took place in M nchenwiler Switzerland in March 2004 and the second workshop which marked the conclusion of the projects in L wenberg Switzerland in October 2005 The papers are organized in topical sections on surveys dependable software dependable computing and dependable networks Network Architectures, Management, and Applications II S.
