Words We Use:

Words We Use Diarmaid Ó Muirthe, 2006-10-31 Diarmaid Muirthe's column Words We Use was a feature of The Irish Times for many years. This collection of his most memorable contributions by turns witty and sympathetic wears its prodigious learning lightly and is sure to delight those captivated by the power of language to shape the world around us. Drawing on the author's nearly inexhaustible knowledge of languages, their mechanics, and idiosyncrasies, Words We Use has sections covering everything from Magic and Shakespeare to Computers and Text Messaging. It will change the way you think about language forever.

The Vocabulary Book Michael F. Graves, 2016 This extensively revised and expanded edition of the bestselling text and teaching resource incorporates the newest research in vocabulary learning and instruction into a complete and balanced program for all K-12 students, from those who struggle in school to those who excel. Literacy expert Michael Graves presents a four-pronged vocabulary program that he has developed and honed for over 30 years. The program has the following four components: Frequent Varied and Extensive Language Experiences, Teaching Individual Words, Teaching Word Learning Strategies, and Fostering Word Consciousness. The text includes theory, research-based strategies, vocabulary interventions, classroom examples, advice for working with English learners, discussion of next-generation standards, and more. The Vocabulary Book, Second Edition, will appeal to reading and subject area teachers, teacher educators, and school, district, and state leaders. New for the Second Edition: instructional approaches developed and classroom tested since the release of the first edition; a chapter specifically on teaching vocabulary to English learners; a chapter specifically on selecting vocabulary words to teach; curricular and instructional elements designed to meet and exceed Common Core State Standards; an emphasis on vocabulary as a vital resource for all students in our increasingly diverse society. If you believe vocabulary instruction is vital to reading, writing, and thinking, then Michael Graves' Second Edition of The Vocabulary Book will give you the tools for powerful instruction, as many teachers discovered with the First Edition. This book will shift your perspective, and you will reap the benefits of placing vocabulary at the center of your instruction. Peter Dewitz, district level reading consultant, Mary Baldwin College. Now that vocabulary is included on the Nation's Report Card, teachers will want to know how to help students increase their word power. Graves's advice will be invaluable in what to do and what not to do. Robert Calfee, professor emeritus, Stanford University. This book is an excellent resource for practitioners interested in developing a comprehensive program for building vocabulary in children. It is also of great value for researchers who wish to design and test vocabulary interventions. Diane August, senior research scientist, Center for Applied Linguistics.

Africa in Contemporary Perspective Manuh, Takyiwaa, Sutherland-Addy, Esi, 2014-05-08 An important feature of Ghanaian tertiary education is the foundational African Studies Programme which was initiated in the early 1960s Unfortunately hardly any readers exist which bring together a body of knowledge on the themes issues and debates which inform and animate research and teaching in African Studies particularly on the African continent This becomes even more important when we consider the need for knowledge on Africa that is not Eurocentric or sensationalised but driven from internal understandings of life and prospects in Africa Dominant representations and perceptions of Africa usually depict a continent in crisis Rather than buying into external representations of Africa with its lacks and aspirations for Western modernities we insist that African scholars in particular should be in the forefront of promoting understanding of the pluri lingual overlapping and dense reality of life and developments on the continent to produce relevant and usable knowledge Continuing and renewed interest in Africa s resources including the land mass economy minerals visual arts and performance cultures as well as bio medical knowledge and products by old and new geopolitical players obliges African scholars to transcend disciplinary boundaries and to work with each other to advance knowledge and uses of those resources in the interests of Africa s people
