To Save the Earth, Work Less!: The Crucial Environmental Issue No One Is Talking About Charles Siegel,2023-10-17 With well chosen data Siegel demonstrates how countries like The Netherlands have created a

prosperous economy with low unemployment due to letting employees work fewer hours To Save the Earth Work Less is an urgent thought provoking resource This is a quick potent read that will spark conversation and provide food for thought on essential questions of the American dream what it actually means to feel satisfied in life and nothing less than the fate of the world Booklife Creating Jobs Americans believe we need rapid economic growth to create jobs and avoid unemployment but that is because we do not have the choice of working shorter hours The Dutch have a better model By law they can choose to work part time which means they avoid unemployment by creating the amount of work people actually want rather than by creating full time jobs We have reached the point where economic growth no longer brings significant benefits International comparisons show that higher income no longer improves a nation s happiness health or educational achievement significantly after it reaches less than two thirds of the current American level And postwar America s push to promote automobile use to stimulate the economy actually made our cities less livable The average American employee works 25% more than the average Dutch employee but the available measures of well being show that all the extra work doesn t do us any good In the course of this century most nations of the world could emerge from poverty and have a comfortable middle class standard of living if we can avoid ecological crisis But that is a big if To create a sustainable economy with a high quality of life it is essential for the world to follow the Dutch model of shorter work hours and slower growth rather than the postwar American model of long work hours and rapid growth But no mainstream politician is talking about the crucial issue of work time

Work Less Jon Peirce,2024-01-02 You can t have a healthy economy with an unhealthy work force Work Less proposes ways to reduce work hours and keep workers happier healthier and more productive Recent years have revealed just how stressed out many workers are While the trend to longer hours has been developing for several decades the trend s effects have been aggravated during the pandemic by the growing use of Zoom and other new technologies for meetings with clients customers and co workers Exhausted and fed up today s workers are starting to insist on shorter hours and greater flexibility as to where they do their work There is growing consensus that the forty hour week the norm since the 1940s has outlived its usefulness And there is an urgent need for new work schedules that adequately reflect the far greater intensity of work today as well as the greater family demands on a labour force made up of almost fifty percent women who bear the brunt of domestic duties Work Less offers practical scheduling suggestions to employers and workers and numerous policy options for government policy makers to improve working conditions

Summary of James Schramko's Work Less, Make More Everest Media,2022-05-13T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 The best way to change your focus is to increase how effective you are Notice I didn t say how productive you are A lot of people obsess about productivity which is all about getting through a lot of work in a given period of time But you should instead focus on doing the right things 2 Everything you have today is the result of everything you ve done up to this point Everything you have in the future depends on what you do as a result of what you learn from this

moment onward So take personal responsibility and start working on your future today 3 If you re not sure how you spend your time each day install time management software on your computer The number of hours you spend on your computer should be under 20 If your report shows you re spending more than 60 70 80 or even 100 hours a week you re running on burnout mode 4 Turn off email alerts and social media notifications The absence of these alerts will give you a sense of peace to focus on higher value tasks without being disturbed
