Time's Second Arrow Robert M. Hazen,Michael L. Wong,2026-02-10 A distinguished geoscientist and rising star astrobiologist offer a stunning new theory upending 150 years of established science and an inspiring new vision of our universe Of the codified laws of nature famously only one inscribes a direction to time the dreaded second law of thermodynamics which declares that the disorder of a closed system tends to increase as time passes New shoes eventually scuff our bodies weaken and die Yet our senses tell us that miraculous order constantly emerges too children grow and learn spontaneous patterns manifest in murmurations of starlings Can it be true that the laws of our universe mandate only dissolution rendering the intricate order of a butterfly s wing the much vaunted complexity of the human brain merely incidental In *Time s Second Arrow* star scientists Robert M Hazen and Michael L Wong overturn more than a century of

scientific canon arguing that in fact there must be a second arrow of time a heretofore missing law of nature that explains how the marvelously complex constituents of our universe came to be Evolution they boldly propose is a universal phenomenon not only in biology but in the entire atomic chemical mineral and physical universe Showing how a natural process of selection for increasing function has shaped the universe since its inception they explore how this new law could possibly help us identify life on other planets and perhaps even understand the purpose and meaning of life on Earth in a new way Elegantly written and deeply moving Time s Second Arrow reveals how our cosmic inheritance includes even alongside loss and decay a drive toward wondrous invention and progress ultimately revising our understanding of the universe and our place within it

Picture Cycle Masha Tupitsyn, 2019-11-19 A multigenre investigation of the personal and cultural annals of memory identity and spectatorship both on and off the screen In exchange for studying what each fraudulent cell looks like under a merciless commercial and commodified lens viewers enable late capitalism to run more smoothly by calling in with their votes as is the case with Reality TV From the inside secrecy appears eradicated as though secrets or coded transparencies comprise the totality of injustice rather than just one part Justice is reduced to a vantage point We see and we see and we see ad infinitum from Picture Cycle With her debut collection Beauty Talk Monsters 2007 Masha Tupitsyn established a new genre of hybrid writing that melded film criticism philosophy and autobiography Picture Cycle continues Tupitsyn s multigenre investigation of the personal and cultural annals of memory identity and spectatorship both on and off the screen Composed over a ten year period Picture Cycle is a pioneering collection whose sharp and knowing vignette like essays form a critical autobiography of the daily images in our

lives Deftly covering a range of theoretical and cinematic frameworks Tupitsyn traces here the quickly vanishing line between onscreen and offscreen predigital and postdigital The result is a unique intellectual study of the uncanny formation of our life s biographies through images **A History of the Earth from Stardust to Man** Hilda Finnemore,1924

Devil's Bargains Hal Rothman,1998 The West is popularly perceived as America s last outpost of unfettered opportunity but twentieth century corporate tourism has transformed it into America s land of opportunism From Sun Valley to Santa Fe towns throughout the West have been turned over to outsiders and not just to those who visit and move on but to those who stay and control Although tourism has been a blessing for many bringing economic and cultural prosperity to communities without obvious means of support or allowing towns on the brink of extinction to renew themselves the costs on more intangible levels may be said to outweigh the benefits and be a devil s bargain in the making Hal Rothman examines the effect of twentieth century tourism on the West and exposes that industry s darker side He tells how tourism evolved from Grand Canyon rail trips to Sun Valley ski weekends and Disneyland vacations and how the post World War II boom in air travel and luxury hotels capitalized on a surge in discretionary income for many Americans combined with newfound leisure time From major destinations like Las Vegas to revitalized towns like Aspen and Moab Rothman reveals how the introduction of tourism into a community may seem innocuous but residents gradually realize as they seek to preserve the authenticity of their communities that decision making power has subtly shifted from the community itself to the newly arrived corporate financiers And because tourism often results in a redistribution of wealth and power to outsiders observes Rothman it represents a new form of colonialism for the region By depicting the nature of tourism in the American West through true stories of places and individuals that have felt its grasp Rothman doesn t just document the effects of tourism but provides us with an enlightened explanation of the shape these changes take Deftly balancing historical perspective with an eye for what s happening in the region right now his book sets new standards for the study of tourism and is one that no citizen of the West whose life is touched by that industry can afford to ignore **Time: Almanac 2007** Editors of Time
