Dr. Paul Wolff's Leica Sport Shots Paul Wolff, 1937 **Image and Video Retrieval** Wee-Kheng Leow, Michael S. Lew, Tat-Seng Chua, Wei-Ying Ma, Lekha Chaisorn, Erwin M. Bakker, 2007-05-22 It was our great pleasure to host the 4th International Conference on Image and Video Retrieval CIVR at the National University of Singapore on 20-22 July 2005. CIVR aims to provide an international forum for the discussion of research challenges and exchange of ideas among researchers and practitioners in image video retrieval technologies. It addresses innovative research in the broad field of image and video retrieval. A unique feature of this conference is the high level of participation by researchers from both academia and industry. Another unique feature of CIVR this year was in its format it offered both the traditional oral presentation sessions as well as the short presentation cum poster sessions. The latter provided an informal alternative forum for animated discussions and exchanges of ideas among the participants. We are pleased to note that interest in CIVR has grown over the years. The number of submissions has steadily increased from 82 in 2002 to 119 in 2003 and 125 in 2004. This year we received 128 submissions from the international communities with 81.63% from Asia and Australia, 25.19% from Europe and 22.17% from North America. After a rigorous review process 20 papers were accepted for oral presentations and 42 papers were accepted for poster presentations. In addition to the accepted submitted papers the program also included 4 invited papers, 1 keynote industrial paper and 4 invited industrial papers. Altogether we offered a diverse and interesting program addressing the current interests and future trends in this area. **Baily's Magazine of Sports and Pastimes** Tresham Gilbey, 1871 Multimedia Databases and Image Communication Maurizio Tucci, 2003-06-30 Multimedia technologies are rapidly attracting more and more interest every day. The Internet as seen from the end user is one of the reasons for this phenomenon but not the only one. Video on Demand is one of the buzzwords today but its real availability to the general public is yet to come. Content providers such as publishers, broadcasting companies and audio video production firms must be able to archive and index their productions for later retrieval. This is a formidable task even more so when the material to be sorted encompasses many different types of several media and covers a time span of several years. In order for such a vast amount of data to be easily available existing database design models and indexing methodologies have to be improved and refined. In addition new techniques especially tailored to the various types of multimedia must be devised and evaluated. For archiving and transmission data compression is another issue that needs to be addressed. In many cases it has been found that compression and indexing can be successfully integrated since compressing the data by filtering out irrelevancy implies some degree of understanding of the content structure. **Baily's Magazine of Sports & Pastimes**, 1871 The Badminton Magazine of Sports and Pastimes, 1910 **The Badminton magazine of sports and pastimes, ed. by A.E.T.
