Hollywood's Vision of Team Sports Deborah V. Tudor, 2018-10-24 This book analyzes the ways in which sport reflects imitates and questions cultural values It examines the representation of team sports heroes race families and gender in films and other media Analysis of the ways in which broadcast media and films create such images allows us to map the ways in which traditional cultural beliefs and practices resist and accommodate changes Films about sport do not reproduce a simple unified set of values rather they exhibit the complications of attempting to negotiate ideological contradictions During the last 50 years sports films have shifted from the heroic idealization of *The Babe Ruth Story* 1948 to films revealing complexities controversies and uncertainties within the sports world like *Everybody s All American* 1988 These contradictions are especially strong in the areas of race and gender which are related major changes in the traditional notion of the hero The book traces the transformation of the image of the hero in sports films within the context of the development of the sports celebrity epitomized by Michael Jordan

Determinants of Achievement in Top Sport Matej Maksimiljan Tusak, Tiziano A. Agostini, Donatella Di

Corrado,2026-03-05 Success in competitive sports depends primarily on athletes skills personality and motivation Many studies have investigated the determinants of success The presence of the zeitgeist social cognitive perspective in psychology has shifted the focus to motivation in top sports Social cognitive approaches have become the primary framework for researching almost everything in psychology Despite extensive discussion and research on the relationship between motivation and personality characteristics there is still a lack of evidence connecting psychological preparation pre competitive states and psychological techniques to sports success and efficiency There is still a gap in determining which psychological approaches and mental techniques contribute to success in top sports Different regression models are expected to explore the determinants of success by comparing males and females as well as young athletes versus top athletes The final formula for success is still undefined regarding the importance of pre competitive states psychological preparation technical skills and knowledge Techniques of psychological preparation such as hypnosis visualization or cognitive stress coping techniques are not clearly defined and discussed Therefore addressing this gap is crucial The following goals should be discussed Psychological factors contributing to success in top sports motivational variables contributing to success in top sports personality structures contributing to top achievements stress and coping strategies in top sports the use of psychological preparation and its relation to top achievement in sports evidence based research on specific psychological preparation techniques and their effectiveness in helping athletes achieve top performances pre competition states and their relation to success in top sports differences in psychological characteristics contributing to top achievements between males and females and between youth athletes and top athletes important factors in the development of motivation for success in athletes ethics and strategies to emphasize fair play in top sports the era of COVID 19 and its relationship to success in top sports including correlation with specific psychological factors Researchers are invited to submit original research to contribute to this topic We also welcome brief research reports systematic reviews and meta analyses reviews and theoretical articles By understanding the factors contributing to success in top athletes we can develop strategies to improve their results and effectiveness Bulletin ,1936 **Theatre and Sport** Thomas Leabhart,1996
