RJ Alexander

Technology Machine:

The Technology Machine Patricia E. Moody, Richard E. Morley, 2001-02-28 How will autonomous agents emergent systems and chaos theory change the way we live and work in the twenty first century As today s manufacturing and production systems grow increasingly complex tomorrow s science of complexity will produce paradoxically simple solutions argue technology experts Patricia Moody and Richard Morley in this astonishing vision of the year 2020 Containing both cutting edge insights and simple truths that provide a roadmap to the future of business and illustrated by case examples from such companies as Motorola Honda GM Solectron Intel Silicon Graphics Modicon Flavors NeXT Japanese Railway and Andover Controls The Technology Machine challenges readers to understand the spirit and core drivers of growth technology knowledge and individual excellence By combining rigorous research with their extensive experience with technology advances that have changed industry Moody and Morley are able to supply simple guidelines for future growth and detail their keen vision of future systems leaders and workers They isolate the three bad business habits at the root of manufacturing problems today shortsightedness restrictive structures and unbalanced improvement fads show how to break them and supply four infallible predictors of the types of breakthrough technologies that will come to dominate the world of the future In that world customers and suppliers are linked by real time online systems business is driven by customer designed point of consumption replication of product and a wide gap grows between The Island of Excellence organization of the future with its holistic approach including two year apprenticeships uniforms and morning exercises and The Others the non elite sweatshop like breakeven companies of the past The book is eloquent original and essential reading for managers in every area of business and industry

Process Plant Design Frank Peter Helmus, 2008-06-25 This book describes the fascinating wealth of activities as they occur in the design construction and commissioning of a chemical plant a jigsaw puzzle of the work of chemical engineers chemists constructors architects electrical engineers process automation engineers economists and legal staff The author first takes the reader through the conceptual phase in which the economic relevance and environmental impact need to be considered and supplemented by accurate estimates of capital requirements and profitability This phase ends with the choice of an appropriate engineering firm and the conclusion of the contract after which the reader is guided through all aspects of the implementation phase from the engineering of the chemical plant to commissioning equipment and material procurement the erection phase and the successful test run after which the new facility is handed over to its owner The book also illustrates many potential sources of errors by means of examples from practice and how aside professional skills teamwork and communication are also absolutely essential to keep such a complex project on track

Artificial Self-recovery and Autonomous Health of Machine Gao Jinji, 2022-10-27 This book explores the research fields of engineering cybernetics bionics artificial self recovery and engineering self recoveries It explains the scientific and technological research results of artificial self recovery autonomous health technology and the application

cases of assisted rehabilitation and autonomous health engineering It provides guidance latest research trends and development direction for researchers scholars and engineers engaged in mechanical equipment fault diagnosis and autonomous health
