

PRINCIPLES OF SUSTAINABLE DEVELOPMENT

Fairness Across Generations (Intergenerational Equity)

01

We must meet today's needs without compromising the ability of future generations to meet theirs.

Justice Within Our Generation (Intragenerational Equity)

02

Everyone should have equal access to resources, opportunities, and a decent quality of life.

Protecting Our Planet (Environmental Stewardship)

03

Safeguarding ecosystems, reducing pollution, and conserving biodiversity are essential for a sustainable future.

Smart Decision-Making (Integrated Approach)

04

Economic, social, and environmental factors should be considered together for balanced progress.

The "Better Safe Than Sorry" Rule (Precautionary Principle)

05

If an action may cause harm, take preventive measures even without full scientific certainty.

Public Participation & Transparency

06

Informed and engaged communities drive better decisions for sustainability.

Making Polluters Pay (Polluter Pays Principle)

07

Those responsible for environmental damage should bear the costs of fixing it.

Shared Responsibility, Different Capabilities

08

All nations should work toward sustainability, but wealthier countries must support those with fewer resources.

The Right To Developement

The Right To Development:

The Right to Development Centre for Development and Human Rights, 2004-05-25 The Right to Development RTD a concept that emerged in the 1970s is one of the most debated and contentious issues in international relations RTD builds on the rights based approach to development seeking to integrate the norms and principles of human rights with policies and plans to promote development Despite its importance for the world's poor and dispossessed a great deal of definitional confusion still surrounds the concept This primer introduces the concept of RTD as well as discusses its practical application in the Indian setting It is divided accordingly into two sections the first of which traces the origins and the evolution of the idea of RTD This section identifies the defining parameters and content of RTD and focuses especially on the three rights the rights to food education and health that have been identified as a good starting point for the implementation of RTD The last chapter in this section underscores the importance of women's rights in order to emphasise the need to focus on safeguarding and promoting the human rights of vulnerable groups Part II covers substantially the Indian situation relating to RTD The first chapter in this section provides an overview of the legal and institutional mechanism in India for the protection of human rights in general and women's rights in particular The next chapter examines the implementation of the rights to food health and education The last chapter in this section details the functioning of Public Interest Litigation PIL which has emerged in recent years as an important mechanism for securing social justice and the challenges and limitations of this mechanism

The Right to Development Wei Zhang, 2019-05-07 In *The Right to Development* authors offer a new path for the implementation and protection of the right to development from the new perspective of the 2030 Agenda for Sustainable Development Instead of emphasizing the economic perspective this book focuses on how to realize the right to sustainable development by resolution of conflicts among the economy the environment and society Integrating the value analysis into the empirical analysis method this book expands the scope of the United Nations Declaration on the Right to Development and strengthens its practical function extracts Chinese experiences lessons from South Asia local knowledge in South Africa and practice in Peru on the implementation of the right to development and puts forward the idea of building human rights criteria in the South

The Declaration on the Right to Development and Implementation Khurshid Iqbal, 2013 The Right to Development RTD is a notable but a controversial third generation human right It was formally pronounced in a 1986 Declaration passed by the UN General Assembly The Declaration proclaims that

the RTD has both international and national dimensions Academic controversies surround the concept of the RTD its status as a human right the legal position of the right holders and the duty bearers the mechanism of its implementation and a juridical definition of the word development The main principle underlying the international dimension of the RTD is the duty of cooperation or solidarity Developing countries want to mainstream the RTD in the current international economic rules and policies Developed countries are reluctant to concede this demand arguing that they have no legal obligation to provide assistance to developing countries for their economic development The RTD is thus a major contentious issue of the international political economy of development The article focuses on the deliberations of the various Working Groups established by the Commission Council on Human Rights to clarify the scope and content of the RTD identify obstacles to and suggest recommendations for the implementation of the RTD at the national and international levels It is argued that the Development Compact model proposed by the UN Independent Expert on the RTD has failed to bring forth a consensus between developing and developed countries The article concludes that the Declaration may be feasibly implemented through existing international development frameworks provided the international community is actively and meaningfully committed to strengthen international development cooperation

The Right to Development Mesenbet Assefa Tadege, 2012

The right to development emerged in the 1970s as part of the struggle of developing countries for a new international economic order This move culminated in the formal recognition of the existence of a human right to development through the UN Declaration on the Right to Development in 1986 Since then efforts to implement the right to development could not achieve the desired result due to the high politicization of the subject Academic literature on the right to development has also focused on the conceptual underpinnings of the subject rather than on giving operational substance to the principles of the RTD This book analyzes the human rights obligations of International Financial Institutions through a right to development paradigm In doing so it argues that both Customary International Law and the various human rights treaties impose a legal duty on International Financial Institutions to respect the human right to development

Insights into Policies and Practices on the Right to Development Carol Chi Ngang, Serges Djoyou Kamga, 2020-10-06

As the world continues to grapple with a range of practical development challenges that are directly linked to livelihood concerns about human well being and declining living standards often overlooked is the human right to development which remains largely unfulfilled In the face of successive global initiatives seeking to remedy these challenges it has become urgent to ask what the universal recognition of the right to development implies if it cannot be translated into improved well being for impoverished peoples around the world The contributors in this timely volume argue that setbacks to development are deeply rooted in the failure to implement the right to development which by nature guarantees equality of opportunities and equitable redistribution of the

resources that contribute to better living standards Assessing policy and practical measures or the lack thereof they offer practical suggestions for implementation that will make the right to development a reality for everyone
