The Wilson Concern:

The Wilson Concern Will Alan, 2005-08-01 The Wilson Concern recounts the story of a man working to bring about change to an indifferent world Jack Wilson is a gifted young engineer inventor with unlimited potential He was thrilled to be invited to work at a government and industry funded program devoted to advancing alternative fueled vehicle technology However Jack soon becomes soured on the program by the endless roadblocks and apathetic attitudes he encounters while working there He abruptly leaves the program and heads to his familiar stomping grounds in coastal South Carolina to somehow try and develop his own ideas Jack's success with his project prompts him to seek professional assistance from his patent attorney with the daunting legal red tape ahead Jack finds support from friends and colleagues along the way but unfortunately news of his groundbreaking work leaks out into the wrong circles An unusual series of events puts Jack on edge When he finds himself cornered and fears that his project may be in jeopardy he takes matters into his own hands Jack bolts and sets off a massive covert manhunt pitting federal agents intent on keeping him safe in a race against a small army of hired guns who mean to do him harm The chase is on *The Boundaries of the New Frontier* Joanna S. Ploeger, 2009 This is a rhetorical case study in the evolving presentation of science to the public Joanna S Ploeger examines the communicative practices of the Fermi National Accelerator Laboratory in suburban Chicago to show how the rhetoric of science functions as an indicator of the intellectual and political interests of scientific institutions She delineates the rhetorical strategies by which Fermilab's founders especially Robert R Wilson sought the consent cooperation and goodwill of its neighbors Wilson's rhetoric was an attempt to distinguish Fermilab from other laboratories in the national network by emphasizing that Fermilab was not a nuclear weapons laboratory and that its sole purpose was to advance theoretical physics for the sake of knowledge To dissociate itself from weapons research Fermilab incorporated the aesthetic of sublimity emblematic of the laboratory's focus on high energy physics into the design of its buildings grounds public art and outreach materials Ploeger tests the success of Wilson's rhetoric through extensive interviews with researchers administrators and visitors at Fermilab Wilson's visual rhetoric strategies were unable to counteract the persistent belief that Fermilab was involved in nuclear weapons research In later years the end of the cold war diminished the urgency of physics research This change in the national climate induced Fermilab's subsequent directors to stress the many potential uses of experimental physics thereby opening Fermilab to a variety of projects at the cost of the aesthetic Wilson had tried to project In tracking the evolution of the lab's representation of itself to its public Ploeger's work combines rhetorical criticism visual rhetorics and qualitative analysis of interview data in studying a salient example that comes into focus only when all three methods are deployed collectively *Delegated Diplomacy* David Lindsey, 2023-03-14 Why do states still need diplomats Despite instantaneous electronic communication and rapid global travel the importance of ambassadors and embassies has in many ways grown since the middle of the nineteenth century However in theories of international relations diplomats are often neglected in

favor of states or leaders or they are dismissed as old fashioned David Lindsey develops a new theory of diplomacy that illuminates why states find ambassadors indispensable to effective intergovernmental interaction He argues that the primary diplomatic challenge countries face is not simply communication it is credibility Diplomats can often communicate credibly with their host countries even when their superiors cannot because diplomats spend time building the trust that is vital to cooperation Using a combination of history game theory and statistical analysis Lindsey explores the logic of delegating authority to diplomats He argues that countries tend to appoint diplomats who are sympathetic to their host countries and share common interests with them Ideal diplomats hold political preferences that fall in between those of their home country and their host country and they are capable of balancing both sets of interests without embracing either point of view fully Delegated Diplomacy is based on a comprehensive dataset of more than 1 300 diplomatic biographies drawn from declassified intelligence records as well as detailed case studies of the U S ambassadors to the United Kingdom and Germany before and during World War I It provides a rich and insightful account of the theory and practice of diplomacy in international relations
