**Advanced Planning in Fresh Food Industries** Matthias Lütke Entrup, 2006-03-30 Production planning in fresh food industries is a challenging task. Although modern Advanced Planning and Scheduling (APS) systems could provide significant support, APS implementation numbers in these industries remain low. Therefore, based on an in-depth analysis of three sample fresh food industries (dairy, fresh, and processed meat), the author evaluates what APS systems should offer in order to effectively support production planning and how the leading systems currently handle the most distinguishing characteristic of fresh food industries: the short product shelf life. Starting from the identified weaknesses, customized software solutions for each of the sample industries are proposed that allow to optimize the production of fresh foods with respect to shelf life. The book thereby offers valuable insights not only to researchers but also to software providers of APS systems and professionals from fresh food industries. *The Advanced Day Planner User's Guide* Hyrum W. **Advanced Cellular Network Planning and Optimisation** Ajay R. Mishra, 2007 Present day cellular networks are a mixture of the technologies like GSM, GPRS, and WCDMA. They even contain features of the technologies that will lead us to the fourth generation networks. Designing and optimising these complex networks requires much deeper understanding. *Advanced Cellular Network Planning and Optimisation* presents radio transmission and core network planning and optimisation aspects for GSM, GPRS, and WCDMA networks with focus on practical aspects of the field. Experts from each of the domains have brought their experiences under one book, making it an essential read for design practitioners, experts, scientists, and students working in the cellular industry.
