[Interventions, Effects, and Outcomes in Occupational Therapy](#) Mary C. Law, Mary Ann McColl, 2010 Occupational therapists are expected to maintain their knowledge of best practice by independently keeping up to date on the latest research With this work the authors have assembled the evidence for effectiveness of occupational therapy for adults and older adults It brings together the latest published peer reviewed literature conceptual approaches outcome measures and intervention approaches to address the three main areas by Identifying a finite set of interventions which occupational therapists deliver most often and providing details of those intervention approaches Identifying where the research evidence

shows that occupational therapists can achieve specific positive effects as a result of those interventions. Identifying the outcome measures most commonly and reliably used by researchers in occupational therapy to demonstrate the effects of interventions. The authors have comprehensively reviewed all of the intervention effectiveness literature for occupational therapy provided for adults. The material reviewed crosses all diagnostic categories and areas of practice for adults and older adults. Analysis of over 500 research studies and systematic reviews form the basis for this book.

Introduction to Approaches in Music Therapy Alice-Ann Darrow, 2004. This book is written for entering students in music therapy programs. It presents the major approaches to music therapy used at this point in time. The process of reviewing these systems of therapy will likely renew the reader's admiration for the versatility of music and prompt appreciation for the diversity of approaches that comprise the profession of music therapy. The procedures for most of approaches are quite distinct nevertheless there remain important commonalities among all of the approaches. The intent of each approach is to stimulate positive changes in the client through music although some approaches emphasize changes in a specific area of human functioning cognitive physical psychological or social. All of the approaches depend on the appeal and influence of music to bring about changes in the client all of the approaches provide valid avenues for therapeutic work and all of the approaches require training to be used effectively. The differences in approaches are well suited to the diversity of practicing clinicians and the clients they serve. The book is organized into three major sections with similar organization of chapters which begin with an overview of a specific approach to music therapy. Also included in each chapter is the history or background of the approach description of the approach including philosophical orientation clinical applications of the approach related research summary or conclusions and suggestions for further reading.
