Syntax Oriented Translator:

A Syntax-Oriented Translator Peter Zilahy Ingerman, 2014-05-12 A Syntax Oriented Translator focuses on the field of programming and the characteristics and functions of compilers and translators. The book first offers information on the metasyntactic language and the details of a parsing processor. Discussions focus on processing recovery and output sections, a detailed flow chart of the parsing processor, parsing form of a grammar, canonical ordering and the metasyntactic language in general. The text then elaborates on some extensions to the metasyntactic language and metasemantic and metapragmatic language including punctuation marks and format control, metasemantic and metapragmatic functions, basic form of the construct and substitution, MSF. The publication examines the details of an unparsing processor as well as lists used in unparsing subroutines and the unparsing processor itself. The book is a dependable source of information for home compiler writers who are interested in the use of a syntax oriented translator.

OAR, 1967 **Legal Integration and Language Diversity** C.J.W. Baaij, 2018-02-01 How can the European Union create laws that are uniform in a multitude of languages? Specifically how can it attain both legal integration and language diversity simultaneously without the latter compromising the former? C.J.W. Baaij argues that the answer lies in the domain of translation. A uniform interpretation and application of EU law begins with the ways in which translators and jurist linguists of the EU legislative bodies translate the original legislative draft texts into the various language versions. In the European Union law and language are inherently connected. The EU pursues legal integration i.e. the incremental harmonization and unification of its Member States laws for

the purpose of reducing national regulatory differences between Member States However in its commitment to the diversity of European languages its legislative institutions enact legislative instruments in 24 languages Language Diversity and Legal Integration assesses these seemingly incompatible policy objectives and contemporary translation practices in the EU legislative procedure and proposes an alternative source oriented approach that better serves EU policy objectives Contrary to the orthodox view in academic literature and to the current policies of the EU this book suggests that the English language version should serve as the original and only authentic legislative text Translation into the other language versions should furthermore avoid prioritizing clarity and fluency over syntactic correspondence and employ neologisms for distinctly EU legal concepts Ultimately Baaij provides practical solutions to the conflict between the equality of all language versions and the need for uniform interpretation and application of EU law
