Biohacker's Magazine Biohacker's Magazine , In a world with so much information that is continually thrown at us sometimes it s tough to know what to accept as Truth and what to reject as false So many things call for our attention that we can become mentally strained and exhausted by the end of the day Because of this we are susceptible to the coaxing idea of giving up our thinking especially our critical thinking We know we can t think about every little thing and decision that crosses our mind throughout the day so we have many of our thoughts on auto pilot which is fine as this helps us from becoming absolutely drained by the end of our day The problem arises when we let this auto thinking expand beyond the everyday task level of thinking and decision making Out of comfort we can allow ideas and words that flash before us throughout our daily lives to merge into our inner brain s reservoir without first weighing the information against our experiences and own inner knowledge of our understanding of the Truth This is essential when we let others that generate ideas thoughts agendas etc think for ourselves because we simply feel too overloaded with the amount of information we have to continually process that we give up our own free right to ponder something It s quite scary when we think about the ramifications that can come of this especially when the world today shows us that those that don t think for themselves are perfect subjects to a form of modern day slavery to whatever ideas and reality the powers want to build up This is why it s so important to take the time to invest in ourselves from the beginning and make learning reading and

curiosity a habit It takes time but the earlier we begin the more time we save in the long run from having to put great time and attention into each thought that enters our mind and decide whether it fits with our values or not We must be like children constantly questioning the world and using our forged experiences to add to our answers and depth of self knowledge In the same manner we must respectfully study and learn from all those who have gone before us and be open to learning about their ways and perspectives Remember that knowledge is not solely subjective it is also objective and is the understanding of a real concrete thing under the aspect of a grasped meaning We use our intellect to study and think rationally about things which adds to our understanding of the truth about ourselves our community and our world The choices that we make are dependent upon our will whether good or bad which is in turn dependent upon our understanding of the truth Man is the only animal that can say I eat and I know that I eat I am and I know that I am I think and I know that I think To know we must think critically about subjects that truly hold value We must make the most of our intellect and discover new data from our experiments from biohacking to add to our knowledge in the search for the truth that propels all of us humans forward to the beat of Life s constant drum If you look for truth you may find comfort in the end if you look for comfort you will not get either comfort or truth only soft soap and wishful thinking to begin and in the end despair C S Lewis

Spark Factor Molly Maloof, 2023-01-31 Foreword by Dave Asprey A breakthrough program for women to revive their lost energy and vitality developed by a leading biohacker and physician Inside of you there is a spark it's what animates you and without it you could not live This energy creation isn't mystical nor is it spiritual it is science We know from research that our cellular machinery transforms the food we eat and the air we breathe into the electricity that fuels us With the right lifestyle inputs we glow with energy but when the demands on our bodies exceed our capacity as is true for so many of us we become burned out mentally and physically Now in The Spark Factor Dr Molly Maloof shares a program uniquely tailored to the biology of women a plan that targets the mitochondria the power source of the cells As Dr Maloof shows the intense all or nothing approaches commonly used by biohackers to optimize health including sustained fasting ultra low carb diets and intense training can be harmful especially for women because they create excessive stress in an already stressed body which can make us tired weak and prone to illness Dr Maloof's innovative program which has been used successfully by her patients offers lifestyle changes that target the unique biology of women and provide immediate and long term benefits Instead of denying our bodies we need to listen to what they are telling us Once we become aware of our physical needs we can give ourselves the resources to become more connected nourished safe and strong at both the micro and the macro level With cutting edge biohacking insights strategies for personalized nutrition hormonal health and stress management The Spark Factor is the book women have been waiting for to help them reclaim their vitality and achieve lasting health "Der Biohacker-Shortcut: In 30 Tagen zu mehr Energie, Fokus und einem fitteren Körper - mit minimalem Aufwand"
