Cooperative Design of Manufacturing Systems in SMEs

Dörte Bastian-Köpp, 2009 Planning and improving of production systems and manufacturing processes is a most complex task in engineering In small and medium sized enterprises SME s it is usually carried out by a group of enterprise planners from different departments within a planning project The main issue of this research is to overcome the logical and technical boundaries between the highly interrelated modelling experts and their specific modelling tools and partial planning models as well as to efficiently coordinate their distributed cooperative planning tasks Therefore a methodical integration concept as well as a groupware based cooperation concept was developed Now it is possible to combine the large number of sophisticated modelling tools factory simulators as well as GPM tools and to guarantee a seamless planning process The conceptual ideas were implemented in a prototypical toolbox to show the technical realization of the flexible concepts for integration and cooperation support Back cover
