The Tombstone Cipher:

The Tombstone Cipher Ib Melchior, 1983 *The Cipher in the Plays, and on the Tombstone* Ignatius Donnelly, 1899
Cipher Ignatius Donnelly, 2019 *The Cipher* Ignatius Donnelly, 2015-06-02 Excerpt from *The Cipher In the Plays and on the Tombstone* I almost feel as if I should apologize for presenting this book to the public There are figures enough in it to make mad the guilty and appal the free I fear I shall have to say to the average reader as Worcester said to Hotspur You apprehend a world of figures here But not the form of what you should attend To many this work will appear as tempting as a table of logarithms and they will refuse to pursue the riddle farther than the opening pages They will say to themselves it is a herring full of bones I know how delightful it is to read a fascinating novel to float in a golden gondola down the stream of delicious romance over the ripples of incident amid the roseate hues of poetry and to ask one to turn from this to 753 167 29 the etc is asking a great deal And yet through this thorny and stony path with its brambles and thistles we advance into a new world more glorious than all the novels ever written The key may be old and rusty and complex but if it opens Aladdin's treasure cavern from whose spoils one can purchase all the delights of the world who will complain if he has to soil his fingers by inserting that key in the lock About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works *The Cipher in the Plays and on the Tombstone* Ignatius Donnelly, 2013-03-01 Bonded Leather binding **The Ciphers of the Monks** David A. King, 2001 This is the first comprehensive study of an ingenious number notation from the Middle Ages that was devised by monks and mainly used in monasteries A simple notation for representing any number up to 99 by a single cipher somehow related to an ancient Greek shorthand first appeared in early 13th century England brought from Athens by an English monk A second more useful version due to Cistercian monks is first attested in the late 13th century in what is today the border country between Belgium and France with this any number up to 9999 can be represented by a single cipher The ciphers were used in scriptoria for the foliation of manuscripts for writing year numbers preparing indexes and concordances numbering sermons and the like and outside the scriptoria for marking the scales on an astronomical instrument writing year numbers in astronomical tables and for incising volumes on wine barrels Related notations were used in medieval and Renaissance shorthands and coded scripts This richly illustrated book surveys the medieval manuscripts and Renaissance books in which the ciphers occur and takes a close look at an intriguing astrolabe from 14th century Picardy marked with ciphers With Indices Mit Kings luzider Beschreibung und Bewertung der einzelnen Funde und ihrer Beziehungen wird zugleich die Forschungsgeschichte die bis
