The Transparent Man:

Patronizing the Public William J. Buxton, 2009-08-16 *Patronizing the Public: American Philanthropy's Transformation of Culture, Communication and the Humanities* is the first detailed and comprehensive examination of how American philanthropic foundations have shaped numerous fields including dance, drama, education, film, music, folklore, journalism, local history, museums, radio, television, as well as the performing arts and the humanities in general. Drawing on an impressive range of archival and secondary sources, the chapters in the volume give particular attention to the period from the late 1920s to the late 1970s, a crucial time for the development of philanthropic practice. To this end, it examines how patterns and directions of funding have been based on complex negotiations involving philanthropic family members, elite networks, foundation trustees and officers, cultural workers, academics, state officials, corporate interests, and the general public. By addressing both the contours of philanthropic power as well as the processes through which that power has been enacted, it is hoped that this collection will reinforce and amplify the critical study of philanthropy's history.

Understanding Cultural Traits Fabrizio Panebianco, Emanuele Serrelli, 2016-02-26 This volume constitutes a first step towards an ever deferred interdisciplinary dialogue on cultural traits. It offers a way to enter a representative sample of the intellectual diversity that surrounds this topic and a means to stimulate innovative avenues of research. It stimulates critical thinking and awareness in the disciplines that need to conceptualize and study culture, cultural traits, and cultural diversity. Culture is often defined and studied with an emphasis on cultural features. For UNESCO, culture should be regarded as the set of distinctive spiritual, material, intellectual, and emotional features of society or a social group. But the very possibility of assuming the existence of cultural traits is not granted, and any serious evaluation of the notion of cultural trait requires the interrogation of several disciplines, from cultural anthropology to linguistics, from psychology to sociology to musicology, and all areas of knowledge on culture. This book presents a strong multidisciplinary perspective that can help clarify the problems about cultural traits.

Manifesting Medicine Robert Bud, Bernard S. Finn, Helmuth Trischler, 1999 The flesh will be confronting big subjects: blood, life, danger, conception. All those interested in how medicine affects the culture of the healthy, well as the fate of the sick, will find this volume of interest.

Cold War Germany, the Third World, and the Global Humanitarian Regime Young-sun Hong, 2015-03-05 This book examines competition and collaboration among Western powers, the socialist bloc, and the Third World for control over humanitarian aid programs during the Cold War. Young-sun Hong's analysis reevaluates the established parameters of German history. On the one hand, global humanitarian efforts functioned as an arena for a three-way political power struggle. On the other, they gave rise to transnational spaces that allowed for multidimensional social and cultural encounters. Hong paints an unexpected view of the global humanitarian regime: Algerian insurgents flown to East Germany for medical care; barefoot Chinese doctors in Tanzania; and West and East German doctors working together in the Congo. She also provides a rich analysis of the experiences of African trainees and

Asian nurses in the two Germanys This book brings an urgently needed historical perspective to contemporary debates on global governance which largely concern humanitarianism global health south north relationships and global migration
