Second Language Learning Theories Rosamond Mitchell,Florence Myles,Emma Marsden,2019-01-21
Written by a team of leading experts working in different SLA specialisms this fourth edition is a clear and concise introduction to the main theories of second language acquisition SLA from multiple perspectives comprehensively updated to reflect the very latest developments SLA research in recent years The book covers all the main theoretical perspectives currently active in SLA and sets each chapter within a

broader framework Each chapter examines the claims and scope of each theory and how each views language the learner and the acquisition process supplemented by summaries of key studies and data examples from a variety of languages Chapters end with an evaluative summary of the theories discussed Key features to this fourth edition include updated accounts of developments in cognitive approaches to second language L2 learning the implications of advances in generative linguistics and the social turn in L2 research with re worked chapters on functional sociocultural and sociolinguistic perspectives and an entirely new chapter on theory integration in addition to updated examples using new studies Second Language Learning Theories continues to be an essential resource for graduate students in second language acquisition

The Basics of Learning Priscilla Puamau, Frances Pene, 2007 **Academy Notes** ,1973 **Diffusion of Innovations, 4th Edition** Everett M. Rogers, 2010-07-06 Since the first edition of this landmark book was published in 1962 Everett Rogers's name has become virtually synonymous with the study of diffusion of innovations according to Choice The second and third editions of Diffusion of Innovations became the standard textbook and reference on diffusion studies Now in the fourth edition Rogers presents the culmination of more than thirty years of research that will set a new standard for analysis and inquiry The fourth edition is 1 a revision of the theoretical framework and the research evidence supporting this model of diffusion and 2 a new intellectual venture in that new concepts and new theoretical viewpoints are introduced This edition differs from its predecessors in that it takes a much more critical stance in its review and synthesis of 5 000 diffusion publications During the past thirty years or so diffusion research has grown to be widely recognized applied and admired but it has also been subjected to both constructive and destructive criticism This criticism is due in large part to the stereotyped and limited ways in which many diffusion scholars have defined the scope and method of their field of study Rogers analyzes the limitations of previous diffusion studies showing for example that the convergence model by which participants create and share information to reach a mutual understanding more accurately describes diffusion in most cases than the linear model Rogers provides an entirely new set of case examples from the Balinese Water Temple to Nintendo videogames that beautifully illustrate his expansive research as well as a completely revised bibliography covering all relevant diffusion scholarship in the past decade Most important he discusses recent research and current topics including social marketing forecasting the rate of adoption technology transfer and more This all inclusive work will be essential reading for scholars and students in the fields of communications marketing geography economic development political science sociology and other related fields for generations to come Theories of Human Learning Guy R. Lefrancois, 1999-08 The old man isn't just anyone In fact professors familiar with previous editions of this book may conclude that he is related to those extraterrestrials Kongor and Kro who so successfully guided students through the maze of historic and current theories that help us understand how humans learn And wise as he is the old man does the job even more effectively than his predecessors in this Fourth Edition of THEORIES OF HUMAN LEARNING WHAT THE OLD MAN SAID Both a serious academic text and a

delightful story this book offers a clear readable look at a full range of learning theories from behavioristic to cognitive examining memory and motivation and concluding with a comprehensive synthesis Its most apparent strength is its easily accessible style but its greatest value lies in the clarity of its concepts

Learning Theories: An Educational Perspective, 5/E Schunk Dale H.,2008-09

Saiva Siddhanta ,1982 *Status and Trends of Distance Education* Börje Holmberg,1981

Social Learning and Social Structure Ronald L. Akers,2011-12-31 The social learning theory of crime integrates Edwin H Sutherland s differential association theory with behavioral learning theory It is a widely accepted and applied approaches to criminal and deviant behavior However it is also widely misinterpreted misstated and misapplied This is the fi rst single volume in depth authoritative discussion of the background concepts development modifications and empirical tests of social learning theory Akers begins with a personal account of Sutherland s involvement in criminology and the origins of his infl uential perspective He then traces the intellectual history of Sutherland s theory as well as social learning theory providing a comprehensive explanation of how each theory approaches illegal behavior Akers reviews research on various correlates and predictors of crime and delinquency that may be used as operational measures of differential association reinforcement and other social learning concepts Akers proposes a new integrated theory of social learning and social structure that links group diff erences in crime to individual conduct He concludes with a cogent discussion of the implications of social learning theory for criminology and public policy Now available in paperback with a new introduction by the author this volume will be invaluable to professionals and for use in courses in criminology and deviance
