Urban Sores On The Interaction Between:

Urban Sores Hans Skifter Andersen, 2019-01-15 This title was first published in 2003 Most European cities have experienced problems in certain neighbourhoods that are termed deprived or excluded Traditionally these were found in the oldest urban areas with lowest quality housing but since the 1980s such areas have emerged in housing estates built around the cities edges These neighbourhoods are marked by visible physical and social problems that disfigure the otherwise pleasant urban landscape and can be seen as urban sores This engaging and thought provoking book provides a deeper understanding of why urban decay and deprived neighbourhoods appear in certain parts of cities as well as how they affect residents and cities in general Drawing on in depth empirical research from Denmark it compares this with other studies from Europe and the United States The author combines theories and methodologies from the fields of geography on segregation economics on processes of urban decay and social research on social exclusion and deprived neighbourhoods to provide original illuminating and invaluable insights *Production and Use of Urban Knowledge* Hans Thor

Andersen, Robert Thomas Atkinson, 2013-06-13 This book provides new insights on cities and the nature of urban development and the role of knowledge management in urban growth It considers how knowledge informs policies and supports decision making and can assist in addressing the drivers of urban change The way that knowledge is produced and used in urban development is analysed with examples drawn from a range of European countries This book illustrates how the development and implementation of policies for urban areas can draw on knowledge management even as the knowledge economy itself stimulates the evolution of the city as a place of innovation and creativity Whilst knowledge grows in importance so do urban issues particularly in economic and political contexts at both European and national levels These essays explore growth in the range of knowledge available in urban contexts the ways to generate new knowledge from a wide range of stakeholders and how these can make an effective contribution to decision making processes in urban development The attractiveness of cities and surrounding areas to knowledge based forms of industry and investment and the competitiveness and performance of cities are a matter of major concern for national governments In a sense it has become too important to leave to city politicians and it is a topic requiring sustained reflection This book gives the reader a detailed understanding of the issues involved and prompts further reflections **Urban Inequality in Finland** Mika

Hytöyläinen, 2024-02-07 *Urban Inequality in Finland* investigates urban governance land and housing policies and the uneven development of the built environment It analyses city strategies policy documents and interviews with urban authorities to show how decentralisation growing inter city competition and the adopting of economic policies informed by an ideology of efficiency and entrepreneurialism in governance have prompted the state and cities in Finland to sell public urban land to get money for public treasuries It demonstrates how recent transformations in the policies of a Nordic welfare state that have traditionally worked to curb urban inequalities now allow for them to become exacerbated **Readings in Urban Theory**

Susan S. Fainstein, Scott Campbell, 2011-03-07 Updated with a majority of new readings the Third Edition of Readings in Urban Theory expands its focus to present the most recent developments in urban and regional theories and policies in a globalized world Around 75% of the readings included are new for the third edition Unifies readings by an orientation toward political economy and normative themes of social justice Expands the focus on international planning including globalization and theories of development Addresses the full range of core urban theory so as to remain the primary text in courses

Phenomenology of the Winter-City Abraham Akkerman, 2016-01-12 This book explores how the weather and city form impact the mind and how city form and mind interact It builds on Merleau Ponty's contention that mind the human body and the environment are intertwined in a singular composite and on Walter Benjamin's suggestion that mind and city form in mutual interaction through history have set the course of civilization Bringing together the fields of philosophy urbanism geography history and architecture the book shows the association of existentialism with prevalence of mood disorder in Northern Europe at the close of Little Ice Age It explains the implications of city form and traces the role of the myths and allegories of urban design as well as the history of gender projection onto city form It shows how urbanization in Northern Europe provided easier access to shelter yet resulted in sunlight deprivation and yielded increasing incidence of depression and other mental disorder among the European middle class The book uses the examples of Kierkegaard Nietzsche Dostoevsky and Kafka to show how walking through the streets squares and other urban voids became the informal remedy to mood disorder a prominent trait among founders of modern Existentialism It concludes by describing how the connection of anguish and violence is relevant to winter depression in cities in North America in particular **Urban Ills** Carol Camp

Yeakey, Vetta L. Sanders Thompson, Anjanette Wells, 2013-11-05 *Urban Ills* Twenty First Century Complexities of Urban Living in Global Contexts is a collection of original research focused on critical challenges and dilemmas to living in cities Volume 1 examines both the economic impact of urban life and the social realities of urban living The editors define the ecology of urban living as the relationship and adjustment of humans to a highly dense diverse and complex environment This approach examines the nexus between the distribution of human groups with reference to material resources and the consequential social political economic and cultural patterns which evolve as a result of the sufficiency or insufficiency of those material resources They emphasize the most vulnerable populations suffering during and after the recession in the United States and around the world The chapters seek to explore emerging issues and trends affecting the lives of the poor minorities immigrants women and children

Life Among Urban Planners Jennifer Mack, Michael Herzfeld, 2020-06-26 A collection of ethnographic case studies of urban planners and their practices Urban planners project the future of cities As experts they draft visions of places and times that do not yet exist prescribing the tools to be used to achieve those visions Their choices can determine how a city will merge its public transit and automobile traffic or how it will meet a demand for thousands of new dwelling units as quickly and with as little avoidable damage as possible *Life Among Urban Planners* considers planning

professionals in relation to the social contexts in which they operate the planning office the construction site and even in the confrontations with those affected by their work What roles do planners have in shaping the daily practices of urban life How do they employ manipulate and alter their expertise to meet the demands asked of them The essays in this volume emphasize planners cultural values and personal assumptions and critically examine what their persistent commitment to thinking about the future means for the ways in which people live in the present and preserve the past *Life Among Urban Planners* explores the practices and politics of professional city making in a wide selection of geographical areas spanning five continents Cases include but are not limited to Bangkok Bogot Chicago Naimey Rome Siem Reap Stockholm and Warsaw Examining the issues raised around questions of expertise participation and the tension between market and state forces contributors demonstrate how certain planning practices accentuate their specific relationship to a place while others are represented to a global audience as potentially universal solutions In presenting detailed and intimate portraits of the everyday lives of planners the volume offers key insights into how the city interacts with the world Contributors Margaret Crawford Ad le Esposito Trevor Goldsmith Mark Graham Michael Herzfeld James Holston Gabriella K rling Jennifer Mack Andrew Newman Lissa Nordin Bruce O Neill Kevin Lewis O Neill Federico P rez Monika Sznal From Mogadishu to Dixon Abdi Kusow,Stephanie R.
