## **Valuation Algebras Generic Structures For Inference:**

*Information Algebras* Juerg Kohlas, 2012-12-06 Information usually comes in pieces from different sources It refers to different but related questions Therefore information needs to be aggregated and focused onto the relevant questions Considering combination and focusing of information as the relevant operations leads to a generic algebraic structure for information This book introduces and studies information from this algebraic point of view Algebras of information provide the necessary abstract framework for generic inference procedures They allow the application of these procedures to a large variety of different formalisms for representing information At the same time they permit a generic study of conditional independence a property considered as fundamental for knowledge presentation Information algebras provide a natural framework to define and study uncertain information Uncertain information is represented by random variables that naturally form information algebras This theory also relates to probabilistic assumption based reasoning in information systems and is the basis for the belief functions in the Dempster Shafer theory of evidence

**Integrated Tracking, Classification, and Sensor Management** Mahendra Mallick, Vikram Krishnamurthy, Ba-Ngu Vo, 2012-12-03 A unique guide to the state of the art of tracking classification and sensor management This book addresses the tremendous progress made over the last few decades in algorithm development and mathematical analysis for filtering multi target multi sensor tracking sensor management and control and target classification It provides for the first time an integrated treatment of these advanced topics complete with careful mathematical formulation clear description of the theory and real world applications Written by experts in the field *Integrated Tracking Classification and Sensor Management* provides readers with easy access to key Bayesian modeling and filtering methods multi target tracking approaches target classification procedures and large scale sensor management problem solving techniques Features include An accessible coverage of random finite set based multi target filtering algorithms such as the Probability Hypothesis Density filters and multi Bernoulli filters with focus on problem solving A succinct overview of the track oriented MHT that comprehensively collates all significant developments in filtering and tracking A state of the art algorithm for hybrid Bayesian network BN inference that is efficient and scalable for complex classification models New structural results in stochastic sensor scheduling and algorithms for dynamic sensor scheduling and management Coverage of the posterior Cramer Rao lower bound PCRLB for target tracking and sensor management Insight into cutting edge military and civilian applications including intelligence surveillance and reconnaissance ISR With its emphasis on the latest research results *Integrated Tracking Classification and Sensor Management* is an invaluable guide for researchers and practitioners in statistical signal processing radar systems operations research and control theory

Kaminka,M. Fox,P. Bouquet,2016-08-24 Artificial Intelligence continues to be one of the most exciting and fast developing fields of computer science This book presents the 177 long papers and 123 short papers accepted for ECAI 2016 the latest edition of the biennial European Conference on Artificial Intelligence Europe s premier venue for

presenting scientific results in AI The conference was held in The Hague the Netherlands from August 29 to September 2 2016 ECAI 2016 also incorporated the conference on Prestigious Applications of Intelligent Systems PAIS 2016 and the Starting AI Researcher Symposium STAIRS The papers from PAIS are included in this volume the papers from STAIRS are published in a separate volume in the Frontiers in Artificial Intelligence and Applications FAIA series Organized by the European Association for Artificial Intelligence EurAI and the Benelux Association for Artificial Intelligence BNVKI the ECAI conference provides an opportunity for researchers to present and hear about the very best research in contemporary AI This proceedings will be of interest to all those seeking an overview of the very latest innovations and developments in this field

**ECAI 2006** Silvia Coradeschi,Anna Perini,Paolo Traverso,2006-08-15 In the summer of 1956 John McCarthy organized the famous Dartmouth Conference which is now commonly viewed as the founding event for the field of Artificial Intelligence During the last 50 years AI has seen a tremendous development and is now a well established scientific discipline all over the world Also in Europe AI is in excellent shape as witnessed by the large number of high quality papers in this publication In comparison with ECAI 2004 there s a strong increase in the relative number of submissions from Distributed AI Agents and Cognitive Modelling Knowledge Representation Reasoning is traditionally strong in Europe and remains the biggest area of ECAI 06 One reason the figures for Case Based Reasoning are rather low is that much of the high quality work in this area has found its way into prestigious applications and is thus represented under the heading of PAIS Distributed Anytime
