**Values in English Language Teaching** Bill Johnston, 2003-01-30 This book offers a new perspective on language teaching by placing moral issues that is questions of values at the core of what it is to be a teacher The teacher student relation is central to this view rather than the concept of language teaching as merely a technical matter of managing students acquisition of language The message is that all language teaching involves an interplay of deeply held values but in each teaching situation these values are played out in different ways Johnston does not tell readers what to think but only suggests what to think about Values in English Language Teaching explores the complex and often contradictory moral landscape of the language classroom gradually revealing how teaching is not a matter of clear cut choices but of wrestling with dilemmas and making difficult decisions in situations often riven with conflict It examines the underlying values that teachers hold as individuals and as members of their profession and demonstrates how those values are played out in the real world of language classrooms Matters addressed include connections between the moral and political dimensions in English language teaching and between values and religious beliefs relationship s between teacher identity and values the meaning of professionalism and how it is associated with morality and values the ways in which teacher development is a moral issue and the marginality of English language teaching All the examples are taken from real life teaching situations the complexity and messiness of these situations is always acknowledged including both individual influences and broader social cultural and political forces at play in English language classrooms By using actual situations as the starting point for analysis Johnston offers a philosophy based in practice and recognizes the primacy of lived experience as a basis for moral analysis Examples come from teaching contexts around the world including Brazil Thailand Poland Japan Central African Republic Turkey and Taiwan as well as various settings in the United States This book will change the way teachers see language classrooms their own or those of others It is a valuable resource for teachers of ESL and EFL and all those who work with them especially teacher educators researchers and administrators

Intercultural Dialogue on English Language Teaching

Christine Manara, 2014-03-17 This book examines how educators conceptualize their profession and re-construct their professional selves. Drawing on a narrative-based study, it reports research that follows closely five multilingual English language teacher educators teaching in a teacher education program at a large private university. It explores their learning and teaching experiences and how they attach meaning to these experiences, the re-construction of their professional identity, their commitment to their profession, and the various factors that mediate these experiences and understandings by analyzing their narrative accounts. In this exploration, there is a particular focus on the nature of language identity and culture in intercultural teacher education settings. Overall, the book demonstrates the complex, nuanced, and dynamic nature of professional learning and intercultural identity construction involving multiple, sometimes competing discourses of professionalism in ELT. The teacher educators' professional learning narratives provide an insight into their struggle for voice (Britzman, 2003) in their immediate teaching and learning context, as well as internationally. Their struggle for a voice highlights the frictions, negotiations, and dialogues with the dominant Western discourses of ELT professionalism that have often been imposed on them in their profession. In addition, their teaching and learning accounts emphasize the importance of revisiting, re-evaluating, and reimagining the teaching paradigm of ELT in this teaching setting in engaging with today's globalized world. These accounts suggest a call for pedagogical and curriculum reform in ELT that takes into account learners' linguistic and cultural identity and that will enable them to use English as a language that mediates their identity work as national, international, and intercultural selves. This book is about English language educators' professional learning and will be of interest to teacher candidates, teachers, and teacher educators who wish to extend their knowledge and understanding of the dynamicity and complexity of teachers' learning through narratives of teaching. [An Intercultural Approach to English Language Teaching](#) John Corbett, 2003 Intercultural language education has redefined the modern languages agenda in Europe and North America. Now intercultural learning is also beginning to impact on English Language Teaching. This accessible book introduces teachers of EFL to intercultural language education by describing its history and theoretical principles and by giving examples of classroom tasks. **Effecting Change in English Language Teaching** Glenn Toh, 2019-05-02 This book is about the challenges that come with initiatives to develop a more humanized, intersectional, and negotiable landscape for English Language Teaching (ELT). It sets out to problematize ingrained and ingrained practices in English teaching, weaving together obscured practices, undisclosed agendas, and ideologically motivated interactions to expose the unspoken agendas at work. Drawing on his own experience of being part of an English as a Lingua Franca (ELF) programme at an urban Japanese university, the author presents a case for rethinking language education in Japan. This book will be of interest to applied linguists, language teachers, and teacher trainers, cultural anthropologists, and anyone interested in the cultural politics of education, especially language education. **The Journal of English Language Teaching (India)**, 2005 [Leadership in English Language Teaching and Learning](#) Christine Anne
