Health Inequalities Johan P. Mackenbach, 2019-09-10 The world we live in is hugely unequal People in a better socioeconomic position do not only lead more comfortable lives but also longer and healthier lives This is true not only in the poorer parts of the world but also in the richest countries including the advanced welfare states of Western Europe which have successfully pushed back poverty and other forms of material disadvantage Why are health inequalities systematically higher rates of disease disability and premature death among people with a lower level of education occupation or income so persistent How can we expect to reduce this when it persists even in the most advanced states Written by a leading figure in public health this book looks to answer these questions by taking a broad critical look at the scientific evidence surrounding the explanation of health inequalities including recent findings from the fields of epidemiology sociology psychology economics and genetics It concludes that a simplistic view in which health inequalities are a direct consequence of social inequality does not tell us the full story Drawing upon a unique series of studies covering 30 European countries and more than three decades of observations it shows that health inequalities are partly driven by autonomous forces that are difficult to counteract such as educational expansion increased social mobility and rapid but differential health improvements Finally the book explores how we might use these new findings to continue our efforts to build a healthier and more equal future Offering a truly multidisciplinary perspective and an accessible writing style *Health Inequalities* is an indispensable resource for health researchers professionals and policy makers as well as for social scientists interested in inequality

Adpositions Dennis Kurzon, Silvia Adler, 2008-05-13 This book is a collection of articles which deal with adpositions in a variety of languages and from a number of perspectives Not only does the book cover what is traditionally treated in studies from a European and Semitic orientation prepositions but it presents studies on postpositions too The main languages dealt with in the collection are English French and Hebrew but there are articles devoted to other languages including Korean Turkic languages Armenian Russian and Ukrainian Adpositions are treated by

some authors from a semantic perspective by others as syntactic units and a third group of authors distinguishes adpositions from the point of view of their pragmatic function This work is of interest to students and researchers in theoretical and applied linguistics as well as to those who have a special interest in any of the languages treated Transactions on Rough Sets IV James F. Peters, 2005-11-15 Volume IV of the Transactions on Rough Sets TRS introduces a number of new advances in the theory and application of rough sets Rough sets and proximation spaces were introduced more than 30 years ago by Zdzislaw Pawlak These advances have profound implications in a number of research areas such as the foundations of rough sets approximate reasoning artificial intelligence bioinformatics computational intelligence cognitive science intelligent systems data mining machine intelligence and security In addition it is evident from the papers included in this volume that the foundations and applications of rough sets is a very active research area worldwide A total of 16 researchers from 7 countries are represented in this volume namely Canada India Norway Sweden Poland Russia and the United States of America Evidence of the vigor breadth and depth of research in the theory and applications of rough sets can be found in the 10 articles in this volume Prof Pawlak has contributed a treatise on the philosophical underpinnings of rough sets In this treatise observations are made about the Cantor notion of a set antinomies arising from Cantor sets the problem of vagueness especially vague imprecise concepts fuzzy sets rough sets fuzzy vs rough sets as well as logic and rough sets Among the many vistas and research directions suggested by Prof Pawlak one of the most fruitful concerns the model for a rough membership function which was incarnated in many different forms since its introduction by Pawlak and Skowron in 1994 Recall here that Prof

The immunological regulation of extracellular vesicles on chronic diseases Zhiwen Luo, Chun Wai Mai, Jinhong Zhu, Shicheng Guo, 2024-06-26 With the transformation of the human disease spectrum chronic non infectious diseases have become the main killer of human health in modern society The interaction

between genes and the environment will cause the body's immune function to be disordered thereby affecting the body's homeostasis and causing various chronic non-infectious diseases. It has been revealed that the occurrence and development of most chronic diseases such as cancer, cardiac disease, diabetes mellitus, autoimmune disease, and neuroimmune disorders are associated with the dysregulation of the immune system.

International Business in Times of Crisis Rob van Tulder, Alain Verbeke, Lucia Piscitello, Jonas Puck, 2022-03-14 International Business in Times of Crisis classifies studies of crises relevant to international business research following a global pandemic which exposed systems failures and fragilities closely across global economic, financial, political, and social systems.

Two-dimensional Crossing and Product Cubic Systems, Vol. II Albert C. J. Luo, 2025-03-29 This book, the 15th of 15 related monographs on Cubic Dynamic Systems, discusses crossing and product cubic systems with a crossing linear and self-quadratic product vector field. The author discusses series of singular equilibria and hyperbolic to hyperbolic secant flows that are switched through the hyperbolic upper to lower saddles and parabola saddles and circular and hyperbolic upper to lower saddles infinite equilibria. Series of simple equilibrium and paralleled hyperbolic flows are also discussed which are switched through inflection source sink and parabola saddle infinite equilibria. Nonlinear dynamics and singularity for such crossing and product cubic systems are presented. In such cubic systems, the appearing bifurcations are parabola saddles hyperbolic to hyperbolic secant flows, third-order saddles, centers, and parabola saddles saddle center.
