Mobility Patterns and Urban Structure Paulo Pinho,Cecília Silva,2016-03-03 Despite extensive efforts to understand the overall effect of urban structure on the current patterns of urban mobility we are still far from a consensual perspective on this complex matter To help build agreement on the factors influencing travel behaviour this book discusses the influence of alternative urban structures on sustainable mobility Bringing together two existing and complementary methods to study the relationship between urban structure and mobility the authors compare two case studies with distinct urban structures and travel behaviour Copenhagen and Oporto Of particular concern is the influence of urban structure factors namely land use and transport system factors and motivational factors related to the social economic and cultural characteristics of the individual traveller The research presented in this book highlights the relevance of centrality in travel behaviour and in more sustainable travel choices Different operational forms of the centrality concept are revealed as important it is shown that more sustainable travel can be influenced by several urban structure factors and that no particular combination is required as long as a certain level of centrality is provided Finally the book concludes that urban structure can on the one hand constrain and on the other hand influence travel choice

The Politics of Urban Development Clarence Nathan Stone,Heywood T. Sanders,1987 In the past twenty years the study of urban politics has shifted from a predominant concern with political culture and ethos to a preoccupation with political economy particularly that of urban development Urban scholars have come to recognize that

cities are shaped by forces beyond their boundaries From that focus have emerged the views that cities are clearly engaged in economic competition that market processes are shaped by national policy decisions sometimes intentionally and sometimes inadvertently and that the costs and benefits of economic growth are unevenly distributed But what else needs to be said about the policies and politics of urban development To supplement prevailing theories The Politics of Urban Development argues that the role of local actors in making development decisions merits closer study Whatever the structural constraints politics still matters Collectively the essays provide ample evidence that local government officials and other community actors do not simply follow the imperatives that derive from the national political economy they are able to assert a significant degree of influence over the shared destiny of an urban population The impact of the collection is to heighten awareness of local political practices and of how and why they make a difference
