eBusiness Paul Beynon-Davies, 2017-09-16 The second edition of eBusiness provides a balanced coverage of electronic business and its role in the transformation of organisations. It takes a worldwide perspective and discusses the increasing role of information and communication technologies within both private and public sector organisations. A strong underpinning in theory is used throughout to help understand the practical implications of this important phenomenon. Chapters are integrated around an overview model of eBusiness and contain case material, exercises and reflective points. New to this Edition: Revised structure which builds a conception of eBusiness from first principles. Integrated chapter case studies and revised free standing international case studies. Coverage of new topics including mobile commerce, electronic government and cloud computing. Increased range of learning material in each chapter as well as fully updated online resources. eBusiness is an ideal text for undergraduate, postgraduate and MBA students of e-business. *AlphaGo Simplified* Mark Liu, 2024-08-27 May 11 1997 was a watershed moment in the history of artificial intelligence. AI: the IBM supercomputer chess engine Deep Blue beat the world Chess champion Garry Kasparov. It was the first time a machine had triumphed over a human player in a Chess tournament. Fast forward 19 years to May 9 2016. DeepMind's AlphaGo beat the world Go champion Lee Sedol. AI again stole the spotlight and generated a media frenzy. This time a new type of AI algorithm, namely machine learning (ML), was the driving force behind the game strategies. What exactly is ML? How is it related to AI? Why is deep learning (DL) so popular these days? This book explains how traditional rule-based AI and ML work and how they can be implemented in everyday games such as Last Coin Standing, Tic Tac Toe or Connect Four. Game rules in these three games are easy to implement. As a result, readers will learn rule-based AI, deep reinforcement learning and more importantly how to combine the two to create powerful game strategies. The whole is indeed greater than the sum of its parts without getting bogged down in complicated game rules. Implementing rule-based AI and ML in these straightforward games is quick and not computationally intensive. Consequently, game strategies can be trained in mere minutes or hours without requiring GPU training or supercomputing facilities, showcasing AI's ability to achieve superhuman performance in these games. More importantly, readers will gain a thorough understanding of the principles behind rule-based AI, such as the MiniMax algorithm, alpha-beta pruning and Monte Carlo Tree Search (MCTS), and how to integrate them with cutting-edge ML techniques like convolutional neural networks and deep reinforcement learning to apply them in their own business fields and tackle real-world challenges. Written with clarity from the ground up, this book appeals to both general readers and industry professionals who seek to learn about rule-based AI and deep reinforcement learning, as well as students and educators in computer science and programming courses. *International Conference on E-Commerce and Contemporary Economic Development*, 2014-06-24 International Conference on E-Commerce and Contemporary Economic Development (ECED) 2014, which will be held on June 7-8 2014. The ECED 2014 aims to bring together researchers, educators and students from around

the world in both industry and academia for sharing the state of art research results and applications for exploring new areas of research and development and for discussing emerging issues on E commerce and Contemporary Economic Development fields 2014 International Conference on E commerce and Contemporary Economic Development ECED2014 aims to bring together researchers engineers and students from around the world in both fields about E commerce and Contemporary Economic Development for information sharing and cooperation Researchers and practitioners are invited to submit their contributions to ECED2014
