Critical Legal Education as a Subversive Activity Helen Gibbon, Ben Golder, Lucas Lixinski, Marina Nehme, Prue Vines, 2015-10-16 In an age when everyone aspires to teach critical thinking skills in the classroom what does it mean to be a subversive law teacher Who or what might a subversive law teacher seek to subvert the authority of the law the university their own authority as teachers perhaps Are law students ripe for subversion agents of or impediments to subversion Do they learn to ask critical questions Responding to the provocation in the classic book *Teaching as a Subversive Activity* by Postman and Weingartner the idea that teaching could or even should be subversive still holds true today and its premise is particularly relevant in the context of legal education We therefore draw on this classic book to discuss in the present volume the consideration of research into legal education as lifetime learning as creating meaning as transformative and as developing world changing thinking within the legal context The volume offers research into classroom experiences and theoretical and historical interrogations of what it means to teach law subversively Primarily aimed at legal educators and doctoral students in law planning careers as academics its insights speak directly to tensions in higher education more broadly

Women's Activism, Feminism, and Social Justice Margaret A. McLaren, 2019-08-15 A wide range of issues besieges women globally including economic exploitation sexist oppression racial ethnic and caste oppression and cultural imperialism This book builds a feminist social justice framework from practices of women's activism in India to understand and work to overcome these injustices The feminist social justice framework provides an alternative to mainstream philosophical frameworks that promote global gender justice for example universal human rights economic projects such as microfinance and cosmopolitanism McLaren demonstrates that these frameworks are bound by a commitment to individualism and an abstract sense of universalism that belies their root neo liberalism Arguing that these frameworks emphasize individualism over interdependence similarity over diversity and individual success over collective capacity McLaren draws on the work of Rabindranath Tagore to develop the concept of relational cosmopolitanism Relational cosmopolitanism prioritizes our connections while crucially acknowledging the reality of power differences Extending Iris Young's theory of political responsibility McLaren shows how Fair Trade connects to the economic solidarity movement The Self Employed Women's Association and MarketPlace India empower women through access to livelihoods as well as fostering leadership capabilities that allow them to challenge structural injustice through political and social activism Their struggles to resist economic exploitation and gender oppression through collective action show the vital importance of challenging individualist approaches to achieving gender justice The book is a rallying call for a shift in our thinking and practice towards re imagining the possibilities for justice from a relational framework from independence to interdependence
