## Zambia Map:

*Geological Atlas of Africa* Thomas Schlüter, 2008-04-19 This atlas is intended primarily for anybody who is in some background for the arrangement of how the interested in basic geology of Africa. Its originality lies in that the atlas was done. The second chapter is devoted to the fact that the regional geology of each African country or territory is reviewed country wise by maps for a fuller appreciation of why this work in Africa is and text a view normally not presented in textbooks worth doing. Chapter 3 provides an executive summary of regional geology. It is my belief that there has long been a need in universities and geological surveys whole in the context of no political boundaries both in Africa and in the developed world for such a summary. The main part of the atlas lies in Chapter 4 where in summarizing geological maps and an accompanying basic alphabetical order each African country or territory text utilising the enormous fund of knowledge that is presented by a digitized geological overview map has been accumulated since the beginning of geological and an accompanying text on its respective stratigraphical research in Africa in the mid 19th century. I hope that the present atlas may satisfy this need.

The 2015 FDIP Report and Scorecard seek to answer a set of fundamental questions about today's global financial inclusion efforts including:

- 1 Do country commitments make a difference in progress toward financial inclusion?
- 2 To what extent do mobile and other digital technologies advance financial inclusion?
- 3 What legal policy and regulatory approaches promote financial inclusion?

John D. Villasenor, Darrell M. West, and Robin J. Lewis analyzed the financial inclusion landscape in Afghanistan, Bangladesh, Brazil, Chile, Colombia, Ethiopia, India, Indonesia, Kenya, Malawi, Mexico, Nigeria, Pakistan, Peru, the Philippines, Rwanda, South Africa, Tanzania, Turkey, Uganda, and Zambia. Countries received scores and rankings based on 33 indicators spanning four dimensions: country commitment, mobile capacity, regulatory environment, and adoption of traditional and digital financial services. The authors' analysis provides several takeaways with respect to expanding financial inclusion across diverse cultural, economic, and political

contexts Country commitment is fundamental Movement toward digital financial services will accelerate financial inclusion Geography generally matters less than policy legal and regulatory changes although some regional trends in terms of financial services provision are evident Central banks ministries of finance ministries of communications banks nonbank financial providers and mobile network operators play major roles in achieving greater financial inclusion Full financial inclusion cannot be achieved without addressing the financial inclusion gender gap This year s Report and Scorecard are the first of a series of publications intended to provide policymakers the private sector nongovernmental organizations and the general public with information that can help improve financial inclusion in these countries and around the world
