Strategies for Collective Minimalist Mobile Robots Chris Melhuish, 2001-04-11. Many might think that the robot industry is not ready yet to build an abstract painter with a political theory. Perhaps Melhuish, an engineering U of the West of England, agrees because what he talks about instead is the idea of getting a whole lot of dumb robots to work together to accomplish something smart. The inspiration for the approach are social insects which are limited individually yet can as a group achieve remarkable feats. He presents minimalist strategies for controlling and coordinating such a system in the domains of moving through the environment, creating work gangs of a desired size, and acting on the environment.
