The green argument has moved a long way forward since the previous edition, and this fully updated book addresses the key issues faced by architect, engineer, and client today. *Green Buildings Pay: Design, Productivity, and Ecology* examines through a range of detailed case studies how different approaches to green design can produce more sustainable patterns of development. These cases are examined from three main perspectives: that of the architect, the client, and the user. Completely revised with all new chapters, cases, sections, and introductory material, the third edition presents over 20 new researched case studies drawn from the UK, Europe, and the USA, written in collaboration with the architects, engineers, clients, and user groups.
