**Indicators to monitor and evaluate the sustainability of bioeconomy** Food and Agriculture Organization of the United Nations, 2019-11-06 FAO has been working for many years on non food biomass products including sustainable bioenergy and biotechnology and it received a mandate to coordinate international work on food first sustainable bioeconomy by 62 Ministers present at the Global Forum for Food and Agriculture GFFA 2015 Moreover FAO has received support from the Government of Germany to develop guidelines on sustainable bioeconomy development Phase 1 2016 Phase 2 2017 mid 2020 This involves work on the bioeconomy monitoring including the selection and use of indicators The ultimate aim of FAO s work on sustainability indicators is to provide technical assistance to

countries and stakeholders in developing and monitoring sustainable bioeconomy more particularly on identifying suitable indicators in line with the Sustainable Bioeconomy Aspirational Principles and related Criteria agreed upon in 2016 by the International Sustainable Bioeconomy Working Group created in the context of FAO's project on Sustainable Bioeconomy Guidelines. These indicators shall help both policy makers and producers/manufacturers in monitoring and evaluating the sustainability of their bioeconomy strategies and interventions. In order to cover all the relevant aspects and issues for a sustainable bioeconomy, our approach identifies impact categories from the sustainable bioeconomy principles and criteria. The monitoring approach suggested is balanced since it considers the three sustainability dimensions: social, economic, and environmental, at the same time it proposes to use a limited set of core indicators to keep the monitoring feasible and cost-effective. The suggested methodology starts with a review of existing monitoring approaches to identify already available indicators from which the authors

*Economic Resilience and Sustainability—Vol. 1* Veland Ramadani, Abdylmenaf Bexheti, Hyrije Abazi-Alili, Christina Theodoraki, Gadaf Rexhepi, Besnik A. Krasniqi, 2026-01-01. This book is the first volume presenting carefully selected chapters from the proceedings of the 8th International Scientific Conference on Business and Economics ISCBE Tetovo North Macedonia which took place in May 2025. The chapters explore the interplay between green and digital transformations, highlighting how businesses and economies can leverage technology and innovation to achieve sustainability goals. They cover a wide range of areas relevant to contemporary business and economics issues such as sustainable business models, digital integration for green growth, economic policies for resilience, circular economy practices, and the role of finance in fostering sustainability. The book is an essential compass for business leaders to navigate the complex challenges posed by the impact of global economic tensions and competition on sustainability efforts.

Strengthening the Environmental Dimensions of the Sustainable Development Goals in Asia and the Pacific Tool Compendium Asian Development Bank, United Nations, United Nations Environment Programme, 2019-01-01. The Asian Development Bank (ADB) in collaboration with the United Nations Environment Programme (UNEP) prepared this tool compendium to help address the issues, challenges, and barriers faced by developing countries from Asia and the Pacific in the successful implementation of the

environmental dimensions of the Sustainable Development Goals (SDGs). The tools presented here can help policy makers gain a better understanding of SDG interlinkages, establish horizontal and vertical policy coherence, and select appropriate guidelines, indicators, and institutional arrangements for effective integration into national policies, plans, and programs. This publication reflects the high-level commitment of ADB and UN Environment to support efforts to accelerate progress in implementing the environmental dimensions of the SDGs.

**PLATE: Product Lifetimes And The Environment** Conny A. Bakker, 2017-11-15. Product lifetimes are critical for the circular economy: resource efficiency, waste reduction, and low-carbon strategies for sustainability, and are therefore of interest to academics from many different disciplines, as well as original equipment manufacturers (OEMs) and other stakeholders. The challenges related to product lifetimes must be tackled from multiple perspectives, making the sharing of knowledge and expertise from different disciplines particularly important. This book presents papers from the second Product Lifetime and the Environment (PLATE) conference held in Delft, the Netherlands, in November 2017. The conference originated from the desire to bring together academic researchers working in the field of sustainability to benefit from each other's knowledge and further advance the field. The book includes the 88 full papers delivered at the conference, grouped according to the following 7 conference themes: design for product longevity, product lifetime optimization, cultural perspectives on the throwaway society, circular economy and product lifetimes, business opportunities, economic implications, and marketing strategies, consumer influences on product lifetimes, and policy regulation and legislation. The book will be of interest to all those concerned with sustainable consumption, circular economy, and resource efficiency.

**Delivering the Circular Economy**, 2015. *Smart and Sustainable Cities and Buildings* Rob Roggema, Anouk Roggema, 2020-05-11. This book brings together the papers presented at the Smart and Sustainable Built Environments Conference 2018 (SASBE). This latest research falls into two tracks: smart and sustainable design and planning, cities, and the technicalities of smart and sustainable buildings. The growth of smart cities is evident but not always linked to sustainability. This book gives an overview of the latest academic developments in increasing the smartness and sustainability of our cities and buildings. Aspects such as inclusivity, smart cities, place and space, the resilient city, urbanity, and urban ecology are prominently featured in the design and planning part of the book, while energy, educational buildings, comfort, building design, construction, and performance form the sub-themes of the technical part of the book. This book will appeal to urban designers, architects, urban planners, smart city designers, and sustainable building experts.
