**Building Urban Resilience** J.J. Woo, Debbie R. Loo, 2024-04-24. This is one of the first few books to discuss the COVID-19 crisis as an urban phenomenon and illustrates this through the case of Singapore and its pandemic response efforts. The book describes the implications and impacts of the pandemic on Singapore's urban landscape, economy, and society. It also assesses the urban interventions that have emerged in response to the pandemic, examining the spatial implications and challenges of delineating safe distancing in various public and commercial spaces and evaluating the effectiveness of these interventions. The book also explains how Singapore's smart city capabilities help with its COVID-19 response. This book will be of great interest to urban planners, healthcare professionals, and policymakers across the world, particularly those who are hoping to learn from the success and limitations of Singapore's COVID-19 responses.

**Fundamentals of Innovative Sustainable Homes: Design and Construction** Avi Friedman, 2023-06-26. This book offers ideas and practices on contemporary design concepts and illustrates them with plans and photographs of outstanding examples. Current planning and design modes of dwellings and neighborhoods are facing challenges of philosophy and form. Past approaches no longer sustain new demands and require innovative thinking. The need for a new outlook is propelled by fundamental changes that touch upon environmental, economic, and social aspects. The depletion of non-renewable natural resources and climate change are a few of the environmental challenges. Increasing costs of material, labor, land, and infrastructure have posed economic challenges, with affordability being paramount among them. Social challenges are also drawing the attention of designers, builders, and homeowners. Walkable communities, aging in place, and

multigenerational living are some of the concepts considered. In addition, live work environments have become part of the economic reality for those who wish to work from home, which has become possible through digital advances. The text would be of interest to scholars working in architecture, urban planning, and construction.

**Reading Marx in the Information Age** Christian Fuchs, 2015-10-23. Renowned Marxist scholar and critical media theorist Christian Fuchs provides a thorough chapter-by-chapter introduction to Capital Volume 1 that assists readers in making sense of Karl Marx's most important and groundbreaking work in the information age, exploring Marx's key concepts through the lens of media and communication studies via contemporary phenomena like the Internet, digital labour, social media, the media industries, and digital class struggles. Through a range of international, current-day examples, Fuchs emphasises the continued importance of Marx and his work in a time when transnational media companies like Amazon, Google, and Facebook play an increasingly important role in global capitalism. Discussion questions and exercises at the end of each chapter help readers to further apply Marx's work to a modern-day context.
