Walford's Guide to Reference Material: Science and technology Albert John Walford, Library Association, 1999 A core resource for the identification and evaluation of reference materials cited in BCL3 and Sheehy While the majority of items are books periodical articles microforms and online and CD ROM sources are also represented This revised and updated volume includes many 1998 publications as possible together with some items published early in 1999 Some 700 items have been added bringing the total to 7 594 No schedule is given for publication of volumes 2 and 3 but presumably the complete project will follow three year cycle established with previous editions *Surface Mount Technology* Ray P. Prasad, 2012-12-06 Surface Mount Technology is not a technology of tomorrow but a technology of today It provides a quantum jump in the packaging technology to produce state of the art miniaturized electronic products However in order to

take advantage of this technology a complete infrastructure must be put in place This requires considerable investment in human and capital resources Intel corporation has made these investments to keep its customers for components and systems on the leading edge of technology Based on the experience of putting this infrastructure in place for system products this book is written for managers who need to manage the risk during its implementation and the practicing engineers who need to improve the design and manufacturing processes for improved yield and cost reduction To accomplish this task I have not only culled the information from published materials but have also depended on input from both my colleagues in Intel and such outside organizations as the Institute of Interconnecting and Packaging Electronic Circuits IPC the Electronics Industries Association EIA and the Surface Mount Council But the underlying basis for this book has been my first hand experience in implementing this technology for Intel Systems Group and my experience at Boeing my previous employer In a fast changing technology like SMT it is very easy to have obsolete information even before the book is published For this reason I have concentrated on the basic principles and practice of the technology

Application Protocol, Initial Graphics Exchange Specification (IGES), Layered Electrical Product Lawrence J. O'Connell, 1994 An application protocol is an information systems engineering view of a specific product The view represents an agreement on the generic activities needed to design and fabricate the product the agreement on the information needed to support those activities and the specific constructs of a product data standard for use in transferring some or all of the information required This application protocol describes the data for electrical and electronic products in terms of a product description standard called the Initial Graphics Exchange Specification IGES More specifically the Layered Electrical Product IGES Application Protocol AP specifies the mechanisms for defining and exchanging computer models and their associated data for those products which have been designed in two dimensional geometry so as to be produced as a series of layers in IGES format The AP defines the appropriateness of the data items for describing the geometry of the various parts of a product shape and location the connectivity and the processing and material characteristics Excluded is the behavioral requirements which the product was intended to satisfy except as those requirements have been recorded as design rules or product testing requirements
