**The Collector's Book of Fluorescent Minerals** Manuel A. Robbins, 2013-04-17 Over the last several decades the number of people who are actively involved in the hobby or science of mineral collecting has grown at an increasing pace In response to the growing demand for information which this large and active group has created a number of books have been published dealing with mineralogy As a result the reader now has a choice among mineral locality guides field handbooks photo collections or books dedicated to the systematic description of minerals However as interest in mineralogy has grown as collectors have become increasingly knowledgeable and aware of mineralogy in its many facets the need for more specialized information has also grown Nowhere is this need greater than in the subject of the fluorescence of minerals The number of collectors who now maintain a fluorescent collection is substantial interest is constantly increasing and manufacturers have recently responded by the introduction of new ultraviolet equipment with major improvements in utility and performance Yet when the collector searches for any information on this subject little will be found He or she will seek in vain for the answers to questions which present themselves as interest in fluorescent minerals grows and matures Which minerals fluoresce Where are fluorescent minerals found What makes a mineral fluoresce Why does ultraviolet light produce fluorescence What is an activator and how does it contribute to fluorescence On these matters the available mineralogy books are largely silent
