Manuscripts of Christiaan Huygens including a concordance with his Oeuvres Complètes Joella Yoder, 2013-05-13 A Catalogue of the Manuscripts of Christiaan Huygens inventories all known manuscripts written by Christiaan Huygens as well as all letters to or from him Because almost all of the manuscripts are housed at the University of Leiden in a collection entitled Codices Hugeniani the catalogue contains an inventory of that entire collection of family papers including many involving Constantijn Huygens In addition because most scholars begin their research by consulting Oeuvres Complètes de Christiaan Huygens which does not provide enough information to relocate the manuscripts edited therein this catalogue essentially footnotes every edited piece by listing the source manuscripts page by page for each volume Thus the researcher should be able to move easily between manuscript and edition

The Copernican Question Robert Westman, 2011-07-28 In 1543 Nicolaus Copernicus publicly defended his hypothesis that the earth is a planet and the sun a body resting near the center of a finite universe But why did Copernicus make this bold

proposal And why did it matter The Copernican Question reframes this pivotal moment in the history of science centering the story on a conflict over the credibility of astrology that erupted in Italy just as Copernicus arrived in 1496 Copernicus engendered enormous resistance when he sought to protect astrology by reconstituting its astronomical foundations Robert S Westman shows that efforts to answer the astrological skeptics became a crucial unifying theme of the early modern scientific movement His interpretation of this long sixteenth century from the 1490s to the 1610s offers a new framework for understanding the great transformations in natural philosophy in the century that followed [Reappraisals of the Scientific Revolution](#) David C.
