*Quality of Life in Ireland* Tony Fahey,Helen Russell,Christopher T. Whelan,2008-06-11 Frances Ruane Director Economic and Social Research Institute Irish and international scholars continue to be curious about Ireland's exceptional economic success since the early 1990s While growth rates peaked at the turn of the millennium they have since continued at levels that are high by any current international or historical Irish measures Despite differences of view among Irish economists and policymakers

on the relative importance of the factors that have driven growth there is widespread agreement that the process of globalisation has contributed to Ireland's economic development. In this context it is helpful to recognise that globalisation has created huge changes in most developed and developing countries and has been associated inter alia with reductions in global income disparity but increased income disparity within individual countries. This book reflects on how from a social perspective Ireland has prospered over the past decade. In that period we have effectively moved from being a semi-developed to being a developed economy. While the book's main focus is on the social changes induced by economic growth, there is also recognition that social change has facilitated economic growth. Although many would regard the past decade as a period when economic and social elements have combined in a virtuous cycle, there is a lingering question as to the extent to which we have better lives now that we are economically better off.
