John Hay Lobban,1902 *The Art of Prompts 2* Kevin Ashley, The Art of Prompts 2 has hundreds of examples and prompt tips to help you create beautiful illustrations comics greeting cards stories articles and so much more with generative AI You don t need to be an expert the book comes with easy to use tools to help you save experiment and share your prompts with Livebook and instantly publish your creations online with the visual Prompt Maker Story Maker Comics Maker Image Maker and more This book is a great resource for anyone interested in digital art creativity writing and artificial intelligence Includes hundreds of illustrations and tips on making beautiful digital art with all modern AI models Google Gemini OpenAI Midjourney and more Enjoy browsing through a gallery of hundreds of illustrations made with prompts try them yourself and have fun Make beautiful art and content easily Includes easy to use online tools and 200 beautiful illustrations and tested prompts you can copy and paste to jump start creating artwork instantly or experiment live with Livebook Learn to instantly create professional digital art for your projects books documentation research or business Illustrations Stories Comics Greeting Cards Articles What s so special about this book It explains how to make prompts to generate art and creative content a very useful skill for any artist or hobbyist making art with powerful artificial intelligence tools Enjoy browsing through a gallery of hundreds of illustrations made with prompts and have fun Easy to follow and well structured The book is well structured so you can quickly find your genres or styles of illustrations or artwork and use hints guidance and copy paste prompts that I tested while working on this book or use Livebook included to create prompts notebooks and more Save time and start with best practices Creating a great artwork with artificial intelligence takes time The book provides best practices and tested prompts to get started quickly What is a prompt A prompt is a loosely defined input like a phrase or instruction that tells A I what to do The art of creating prompts is just like the art of talking to people if

you're skilled in this art you'll get fantastic results. More creative AI resources. What's new in this book besides lots of new prompt tips? Each prompt in this book is available online on Livebook, a new resource where you can keep and share your prompts, play, experiment, make articles, posts, illustrations, books, websites, and more. Livebook helps you create content based on just your ideas, no special skills necessary, and provides a content management platform for generative AI with lots of easy-to-use generative AI tools built in: the visual Prompt Maker, Comics Maker, Greeting Card Maker, Story Makers, and tons of templates as part of the Prompt Mania prompt garden. Ta Da Meet the Prompt Maker, one of the new tools included in Livebook, simplifies prompt engineering, shortening the path from your ideas to content; the tool will automatically make awesome visual and text prompts for you, saving you typing and time from a single idea. Prompts made by Livebook Prompt Maker fit any transformer and significantly improve the output quality for Google, OpenAI, Midjourney, and other models. Also in the book: multi-modal prompts for video, images, text, and more. While the first *Art of Prompts* book focused purely on imaging and art, I decided to include more tips in this book that also cover text and videos. So in addition to vision and images in this book, you'll find entirely new comics, text, and conversation sections, including Google tools and new models like multi-modal Gemini that explains the art of getting what you want from machines and artificial intelligence. This book is to make anyone productive with AI; you don't need to be a data scientist to use methods and tools I share here. I recommend checking books in this series for the background of many methods explained here. Livebook for Business brings a comprehensive generative AI solution for businesses, teams, and organizations. For example, at the US Olympic and Paralympic Committee, Livebook powers AI Coaching that teams and coaches as part of long-term Team USA readiness program for LA Olympics 2028. It is the first-ever content management system (CMS) designed from the ground up to work with generative AI. Livebook generative AI kiosk had been installed at the Computer History Museum in Silicon Valley, next to the first computers and processors, entertaining visitors with generative stories. Hope you enjoy this book, learn, and have fun.
