## **The Kiss Format Audio:**

**Mobile Multimedia in Action** Ilpo Koskinen, 2017-07-05 Mobile Multimedia in Action displays a revealing picture of how people communicate using camera phones and other mobile multimedia devices. With such devices spreading faster than practically any other new technology, questions about how these devices are being used and abused to capture and distribute embarrassing or raunchy images and content and what should be done about it are surfacing. This volume presents the first detailed study of the use of these devices. Using a variant of social science research known as ethnomethodology, Koskinen explores the kinds of images people take with camera phones and how they use sound to enhance these images. The book asks two main questions: First, what kinds of methods of expression such as visuals or sound do people use when they design multimedia messages? Second, how do people interact with and respond to each other through mobile multimedia devices? Koskinen has a broader objective centering on the impact of these devices on human relationships and society at large. He asks: What do people do with these devices? Is mobile telephony moving toward a more practical direction or will it simply become a visual chatty channel fit for gossip but not for real news or other practical purposes? What kind of social activities and organizations does it best serve: peer-to-peer networks or institutional ones? Koskinen examines these questions from three unique perspectives: the design elements of mobile multimedia which considers methods of expression people use in designing multimedia messages; mobile multimedia as interaction which looks into how people interact with each other using this technology and makes a case for studying multimedia as a naturally occurring activity; and mobile multimedia in society which searches for answers as to the societal consequences of mobile multimedia usage. A groundbreaking work, *Mobile Multimedia in Action* will be a fascinating read for both multimedia device professionals and everyday users alike. Providing a glimpse into the future, Koskinen asks where mobile multimedia technology is taking mankind and society. [Space Fostering African Societies](#) Annette Froehlich, 2022-01-01 This peer-reviewed book provides detailed insights into how space and its applications are and can be used to support the development of the full range and diversity of African societies as encapsulated in the African Union's Agenda 2063. Following on from Part 1 and 2 which were highly acclaimed by the space community, it focuses on the role of space in supporting the UN Sustainable Development Goals in Africa but covers an even more extensive array of relevant and timely topics addressing all facets of African development. It demonstrates that while there have been significant achievements in recent years in terms of economic and social development which have lifted many of Africa's people out of poverty, there is still a great deal that needs to be done to fulfill the basic needs of Africa's citizens and afford them the dignity they deserve. To this end, space is already being employed in diverse fields of human endeavor to serve Africa's goals for its future, but there is much room for further incorporation of space systems and data. Providing a comprehensive overview of the role space is playing in helping Africa achieve its developmental aspirations, the book will appeal to both students and professionals in fields such as space studies, international relations, governance, and
