## **Think About It You Might Learn Something:**

**Oh If You Would Only Listen** Laura Feise-Dork.,2011-10-19 Ahh youth what a great time in your life Oh how we change as we grow older Our hopes dreams fears and self confidence begin to form in our minds as we grow older Things change And as they do we learn we grow and we change But when you begin to mature and your self confidence forms in your mind You learn that it is not necessary to always be in such a hurry When we are young we think there is just no time to stop and smell the roses Being older now I do take the time to stop and the roses smell so sweet Now I understand the meaning Bad things will pass with time It is up to us to take care of our mind Marriage is a big change in our life Now you have to give up some of your privacy give more than you take and have a lot more patience Oh what we learn as we grow There are so many things going on in our mind The television used to be entertaining but now it puts all kinds of strange thoughts in your head Be a careful viewer It is up to us to keep our mind in order Our body might shrink as we grow older but our brain continues to grow Feed it with healthy things

**One Dear Land** Ellen Hadley,2021-11-19 Imagine in your next life you might be in any random situation ignorant poor unhealthy living with war or a mentally ill family member etc and you can't predict it What changes would this make you want in our systems of information economics community government and religion If you decide to work for one of these changes now which should you pursue It might seem prudent to focus on one in isolation but it wouldn't be enough Other systems could work against it And though you might initially get more allies than if you talked about other systems you could lose those allies if they began to suspect your overall vision conflicted with theirs By looking at how changes in many systems fit together from as many perspectives as possible you might be able to reach deeper agreement with others on a big picture vision Then you could move the components forward together with greater trust watching each system changing and facilitating change in the others That's what this book first written in 1990 yet amazingly relevant tries to do both in essay and in novel form The essay discusses the internet free enterprise enhanced by universal basic income UBI community centers with publicly funded workers providing universal basic services at UBI affordable prices world government and a religion that helps people identify with the plights of others The novel tells an inspiring human story of a couple as they marry and become grandparents while helping to develop these systems This second edition has a new foreword to help integrate these ideas into the real world It will be wonderful if any of the ideas in this book stimulate you Even better this book may help you develop a cohesive worldview perhaps even one you can share with others in moving our world forward
